On Motion of Commissioner Ed. H. Helwig, seconded by Commissioner Johnnie Pustka, and duly passed, the Court granted the change of name to Best's Creek as request by the Department of the Interior, Washington, for the Official United States Geological Survey Maps.

Memo to: Commissioner Ed H. Helwig

From: Mrs. R. L. Wallace, County Chairman
Fort Bend Historical Survey Committee

Date: September 13, 1971

We have received a request from the Department of the Interior, Washington, concerning a name change on a creek beginning in Waller County and flowing into the Brazos a couple miles below Fulshear. This Creek now has several names, Bessie's Creek, Hady's Creek and Heddy's Creek.

Along with the request was documentation showing that the Creek was originally named Best's Creek by the early settler Isaac Best who had the original land grant where the creek originated. Apparently it had been mispronounced and down through the years it has come to be called Bessie's Creek which sounds similar.

The Descendants of Isaac Best have petitioned that this Creek be given its original proper name of Best's Creek and the Department of Interior consider it a well documented request and ask that we sanction this name change for the Official United States Geological Survey Maps.

Mr. Kucherka states it has been confusing with several names on the Creek as they use the name Hady's Creek on their maps. It seems it would be less confusing to have the entire creek under the original name of Best's Creek and I ask that you consider granting permission to change the name.

COMPTROLLER

Comptroller of Public Accounts
State of Texas

November 22, 1971

Mrs. Betty Hanzelka
Tax Assessor-Collector
Fort Bend County
Richmond, Texas 77469

Dear Mrs. Hanzelka:

I have received your letter of November 19, 1971, asking if it is permissible for Fort Bend County to loan or donate old tax rolls which are no longer in use, to the Fort Bend County Historical Museum.

In the absence of any definite law on this subject, I have discussed the matter with the office of the Attorney General of Texas. We are of the opinion that this action can be taken but if we were in your position we would follow the procedure of obtaining a resolution from your Commissioners' Court ordering you to take this action and I would file same with the County Clerk where it would serve as a permanent record.

I am sure that you will determine that the Historical Museum will preserve these old tax rolls inasmuch as they are definitely a part of the history of the county as well as being a part of the records of all property in your county. However, if something should happen to these records you can always fall back on the copy which we maintain in the State Comptroller's Department and also we have micro-filmed these old records. Therefore, I would assume that you would be safe in allowing the old tax rolls to be taken out of your office.

With kindest personal regards, I am

Yours very truly,

Robert S Calvert

Ella Macek, County Clerk;

and at such session, among other proceedings had, the following order was passed:

"WHEREAS, the Texas Legislature has established the Texas County and District Retirement System, pursuant to Subsection (c), Section 62 of Article XVI of the Texas Constitution, and has provided for voluntary merger into said System of county retirement, disability and death compensation funds heretofore established under Subsection (b), Section 62, of Article XVI; and

"WHEREAS, said constitutional provision and the statutes empower, direct, and require the governing body to determine whether the County shall participate in the statewide System so established; and

"WHEREAS, the Employees' Retirement System of FORT BEND County, Texas, was established in 1964 and is now operating under authority of Subsection (b), Section 62 of Article XVI of the Texas Constitution; and whereas actuarial studies have been made of the

proposal for merger of the same with the Texas County and District Retirement System on the terms hereinbelow delineated, which studies were made in conformity with specifications adopted by the Board of Trustees of the Texas County and District Retirement System, and establish that the obligations undertaken by or on behalf of the County upon merger can be discharged and fully funded within the time and manner provided by Chapter 127, Acts Regular Session, 60th Legislature, as amended (which act is hereinafter referred to as "Chapter 127"); and

"WHEREAS, this Commissioners' Court has determined that it is to the public interest that the Employees' Retirement System of FORT BEND County, Texas, be merged into the Texas County and District Retirement System and that the County participate in said System for the purpose of more adequately providing for retirement of its superannuated or disabled employees; it is therefore ORDERED BY THE COMMISSIONERS COURT OF FORT BEND COUNTY, TEXAS:

I. That the Employees' Retirement System of FORT BEND County, Texas, heretofore organized and existing pursuant to Section 62(b) of Article XVI of the Constitution of Texas, shall be and become merged into the Texas County and District Retirement System effective at 12 o'clock midnight on the 31st day of December, 1971, and that the County of FORT BEND Texas, shall become, and hereby elects to become, a participating subdivision of the Texas County and District Retirement System (hereinafter called the "State System") at said date and time.

II. (a) As used in this order, the term "employee" means and includes all persons conforming to the definition of the term "employee" as set out in Subsection 6 of Section II of Chapter 127, and includes each state and district officer who

receives supplemental compensation from FORT BEND County, in addition to that received from the State of Texas.

(b) Each person who, on the effective date of participation merger is a member of the Local System, or who is an employee of the County of FORT BEND, shall become a member of the State System on said date, in accordance with and upon the terms and conditions stated in the merger agreement hereinbelow authorized to be executed, if his membership in the State System is required under the terms of said agreement.

(c) All persons who conform to the definition of "employee" as set out above, but who were not eligible for membership in the local system as established, and are not members of the local system at the date of merger, shall become members of the state system under the merger agreement, unless such person executes a waiver of membership in the time and manner prescribed below: provided, however, that no employee who is sixty (60) years of age or more at date of merger shall be eligible for membership unless his service to such subdivision prior to the date of merger is equal to or is in excess of the period by which his then attained age exceeds the age of sixty (60) years.

Any person who becomes a member of the state system as of the date of merger shall not be allowed any credit for service prior thereto except upon the following conditions:

If, for all months during which such person performed service as an employee (as defined in subsection 6, Section II, of Chapter 127) of the subdivision between the time the local system was established and the date of merger, such person shall pay to the state system (within 90 days after date of merger) a sum equal to the deposits which a member of the local system drawing the same compensation during the same period was required to make to the

197

local system, and if the subdivision pursuant to the merger agreement contributes to the state system within the 90-day period an equal amount, then in such event:

(i) The sum so deposited by such member with the state system shall be deposited by it to the credit of such member's individual account in the Employees Saving Fund and shall be treated in the same manner as provided below as to transfer upon merger of individual deposits of members of the local system;

(ii) The sum so deposited by the subdivision shall be received and deposited in the subdivision's account in the Prior Service Accumulation Fund; and

(iii) Such member shall thereupon receive credit for all service to the subdivision antedating the effective date of merger.

Any person not a member of the local system, but who would become a member of the state system under the terms of this subsection may elect not to become a member if within thirty (30) days after the effective date of the merger agreement, he shall execute and file with the Director of the state system a written waiver of membership in such form as the Board may prescribe. Any such person who files such a waiver of membership may apply for membership in the state system as of the first day of any month thereafter, if the person would then be eligible for membership in the system as a beginning employee of the subdivision, and such person may thereupon become a member of the system but without credit for any service antedating date of membership.

(d) Each person who shall become an employee of the County subsequent to the effective date of participation and who is not already a member of the System, shall become a member at date of and as a condition of his employment, provided he shall at such date be less than sixty (60) years of age.

III. From and after the effective date of participation, each employee of FORT BEND County shall make deposits to the State System for each payroll period at the rate of seven per centum (7 %) of earnings, which deposits shall be withheld by the County Auditor (payroll officer) from the compensation of the employee, in accordance with Subsection 1, Section IV of the Act above-mentioned. The rate of deposits herein designated shall constitute the "initial deposit rate" of the County as a participating subdivision of the System.

IV. In addition to deposits, as above specified, each employee member shall make to the System expense contributions (if any) each month at such rate as may hereafter be set by the Board of Trustees of the System within the limits and in the manner prescribed by law.

V. The County from and after date of participation shall make benefit contributions to the State System in an amount which for each payroll period ensuing from and after date of participation in the State System is equal to the sum of all deposits made to the System by all of its employees for such period; and in addition shall make expense contributions each month to the State System which shall equal the expense contributions made to the State System for such month by all of the County's employees. The sums here designated to be paid by the County to the State System are hereby appropriated out of and shall be paid from the General Fund.

VI. It is further provided that:

(a) prior service annuities of the Local System in effect at date of merger shall be increased from and after date of merger by 25 %;

(b) current service annuities of the Local System in effect at date of merger shall be increased from and after date of merger by None %;

(c) current service credits earned after merger shall be equal to 100 % of the deposits made to the State System by a member.

VII. The County Judge on behalf of the County shall execute and the County Clerk shall attest, and together with the Retirement Board of the Employees' Retirement System of _____ FORT BEND County, Texas, shall execute on behalf of the Local System, a merger agreement with the State System, upon substantially the following terms and conditions, viz:

THE STATE OF TEXAS X
X
COUNTY OF FORT BEND X

This tripartite agreement, made by and between the County of FORT BEND, State of Texas, hereinbelow called the County, as the first party; the Employees' Retirement System of FORT BEND County, Texas, (hereinafter called the "Local System") heretofore organized and existing pursuant to Section 62 (b) of Article XVI of the Constitution of Texas, second party; and the Texas County and District Retirement System, a public corporation and agency established by Chapter 127, Acts Regular Session of the 60th Legislature (hereinafter called "Chapter 127") pursuant to Section 62 (c) of Article XVI of the Texas Constitution (hereinafter called "State System"), as third party;

W I T N E S S E T H:

1. That the Employees' Retirement System of FORT BEND County, Texas, shall be and become merged into the Texas County and District Retirement System, effective the 31st day of December, 1971, at 12 o'clock midnight and that the County of FORT BEND, Texas, has elected to become and shall become a participating subdivision of the Texas County and District Retirement System, effective the 31st day of December, 1971, at 12 o'clock midnight, which time and date is hereinafter referred to as the "effective date" of merger and of participation.

2. All persons who are members of the local system at the effective date of merger shall become members of the State System upon merger, and each shall be allowed creditable service by the State System for the number of months of creditable service allowed him by the Local System to date of merger. The County Auditor (authorized county official)

shall make and certify to the State System a list of all persons who are members of the Local System on the effective date of merger, together with the number of months of creditable service to date of merger which has been allowed him by the Local System, the amount of accumulated contributions standing to the credit of each such member at date of merger, and the member's "average Local System earnings" computed as provided in Subsection 9, Section X, of Chapter 127; provided that as to any member of the Local System whose retirement rights have become vested and who has had no earnings paid him by the County during the 60 months preceding merger, his average Local System earnings shall be computed on the earnings paid him during the last twenty-four months of service actually performed for the County, excluding earnings in excess of $1,000.00 in any one month, or 1/12th of annual earnings prescribed by the County's Participation Order as maximum current service earnings, whichever amount is the lower.

3. Each person who is an "employee" (as that term is defined in Subsection 6, Section II, of Chapter 127) of the County on the effective date of participation, but who was not eligible for membership in the Local System as established and is not a member of the Local System at the effective date of merger, shall (unless he is ineligible for membership in the State System under the provisions of Chapter 127, particularly subsection 5 of Section X of said Act) become a member of the State System, upon the conditions and with the effect as provided in Subsection 5, Section X of Chapter 127, unless he shall file with the Director of the State System within thirty (30) days after the effective date of merger, a written waiver of membership in such form as the Board of Trustees of the State System shall prescribe.

4. The County Auditor (authorized county official) shall make up and certify

to the State System a list of all persons drawing, or at effective date of merger who are entitled to draw, annuities or other benefits from the Local System, together with their respective addresses, the amount and nature of the benefit which is being paid them, the names and addresses of alternate and contingent beneficiaries and the nature and extent of their interests, and shall furnish such other information concerning the same as may be required by the Director of the State System.

Upon transfer of the assets of the Local System to the State System, as hereinafter provided, the State System shall undertake to pay such annuities, increased as hereinafter provided, but subject to the terms, conditions and limitations set out in Chapter 127, and to the further terms and conditions of this agreement.

5. All assets of the Local System shall be transferred to, and are hereby assigned to the State System, and the State System hereby agrees to receive the same, for crediting as hereinafter provided, on the basis of the following valuations:

(a) The value of every United States Government Bond will be determined on an amortized basis to yield three and one-fourth percent (3-1/4%) per annum, calculated to call date of such bonds if the coupon rate is in excess of 3-1/4%; otherwise, to maturity date.

(b) Market value of all other bonds, to be established as of date of merger by appraisal by not more than three registered dealers in securities of the type involved, who shall be selected by the Director of the State System;

(c) Cash shall be accepted at actual value, and time deposits shall be accepted at face amount plus accrued interest to date of merger.

It is agreed that the Local System on merger will transfer in cash at least one and one-half (1-1/2) times the

adjusted annuities to be paid annuitants of the Local System during the calendar month immediately following the effective date of merger. The Local System shall refund all accumulated deposits of persons terminating and requesting refund prior to effective date of merger.

6. Upon transfer of assets of the Local System to the State System, the value of the same ascertained and determined as provided in paragraph 5, above, shall be credited by the State System as follows:

(a) An amount equal to the sum of the accumulated deposits of the individual members of the Local System will be credited to the Employees Saving Fund of the State System. The State System will establish individual accounts for all such members and will credit to such individual accounts the respective accumulated deposits of the individual members as of the effective date of merger. No current service credits shall accrue in this System to the members of the Local System on account of the accumulated deposits so transferred and credited upon merger.

(b) An amount equal to the required annuity reserve, based on such annuity tables as shall be adopted by the Board with regular interest, for current service annuities in the Local System as of the date of merger increased on merger as hereinafter provided shall be credited to the Current Service Annuity Reserve Fund of the State System, and such current service annuities shall thereafter be obligations of and paid from the Current Service Annuity Reserve Fund of said System.

(c) The remaining assets of the Local System will be credited to the subdivision's account in the Subdivision Prior Service Accumulation Fund of the State System for the partial funding of the obligations assigned to such account in accordance with Chapter 127.

7. Each member of the Local System who upon merger becomes a member of the State System, and each other person who becomes a member at date of merger and qualifies as provided in Subsection 5, Section X, of Chapter 127, for creditable service antedating merger, shall be granted an "allocated special prior service credit" which is Forty-five per centum (45 %) of his "maximum special prior service credit" calculated in the manner provided in paragraph (e), Subsection 9, Section X, of Chapter 127.

8. As to persons becoming members of the State System pursuant to this merger agreement, or by virtue of the participation of the County in the State System, it is agreed that eligibility for service retirement, and the standard service retirement benefit payable to members so retiring; optional benefits, and the rights of vesting and of deferred retirement; eligibility for disability retirement, and the standard disability benefits payable therefor; and the rights and consequences of withdrawal of deposits on terminations of membership shall all be governed by the provisions, conditions and limitations set out in Section VII of Chapter 127, subject to the following exceptions:

(a) No retirement of any person becoming a member of the State System shall be effective for a period of one hundred twenty (120) days from and after the effective date of merger.

(b) Any member who has a prior service certificate for service with the County in force and effect at time of his retirement shall be entitled to a prior service benefit which is the actuarial equivalent of his accumulated "Allocated Special Prior Service Credit," as provided for in this agreement, in lieu of a prior service benefit calculated in the manner prescribed in paragraph (c), Subsection 2, Section VII of Chapter 127, as to service retirement benefits, or in lieu of the prior service benefit calculated in the manner prescribed in paragraph (b) of Subsection 6, Section VII, Chapter 127, as to disability retirement benefits; but the same shall be subject to the

power of the Board of Trustees of the Texas County and District Retirement System to reduce payments for any such prior service annuities under the circumstances and in the manner provided in Section V of Chapter 127.

(c) Any member of the Local System whose eligibility to receive a retirement benefit became vested under the terms of the orders governing such system on or before the effective date of merger shall retain in the State System the eligibility to retire at the same time and in the same circumstances to which he would have been entitled under the Local System; but his retirement benefit shall be calculated in accordance with the provisions of this agreement.

(d) It is specifically provided that the allocated special prior service credit granted to any member at merger shall not be less than an amount which together with the amount of such member's accumulated deposits at the time of merger will provide a benefit at retirement equal to that which under the provisions of the orders governing the Local System in effect at the time of merger, he would have been entitled to receive at retirement based upon service prior to date of merger.

(e) Current service credits earned after merger will be equal to 100 % of the deposits of the member.

9. (a) It is agreed that current service annuities allowed by the Local System and which are in effect and obligations of the Local System at effective date of merger, shall be increased as to monthly benefits payable after effective date of merger by None%.

(b) It is agreed that prior service annuities allowed by the Local System and which are in effect at the effective date of merger, shall be increased as to benefits payable after effective date of merger by 25 %.

10. The Local System will furnish to the Director of the State System the currently-effective instruments by which its members have designated beneficiaries who are to receive payment of their accumulated deposits in event of death before retirement; and the

State System will recognize such designations, and will make payments of accumulated contributions based thereon, for and during a period of six (6) months from and after date of merger, at which time all such designations shall be held and considered to expire and be of no further force or effect. The County will undertake to obtain on behalf of the State System the execution of beneficiary designations for the State System within the period of six (6) months from date of merger.

11. The rights and obligations of the persons who become members of the State System by virtue of this agreement and/or the participation of the County of Fort Bend and the obligations of the County as a participating subdivision, shall be governed by the provisions of Sections I through IX of Chapter 127, except as expressly modified by Chapter X of said Act, or by the express terms of this agreement. It is further recognized and understood that members of the System have vested property interests in their accumulated deposits prior to their retirement; but the power of the State of Texas to amend the laws otherwise pertaining to the System, and to the benefits payable thereunder, is recognized and understood, and nothing in this agreement is intended to be in derogation thereof.

12. The merger of the Local System into the State System shall be considered consummated, and the powers and obligations of the State System as to the subject-matter shall become operative, when:

(a) the assets of the Local System have been transferred and delivered to the State System as above provided;

(b) the State System has been furnished a list of annuitants of the Local System, together with the types and amounts of benefits payable, as hereinabove provided; and

(c) The State System has been furnished with a certified list of the members of the Local System at effective date of merger, together with the average Local System earnings of each, the amount

of the accumulated contributions of each at date of merger, and the amount of creditable service antedating effective date of merger to which each is entitled, as hereinabove provided.

It is further agreed that the officials of the County will furnish promptly to the Director of the State System certified copies of all orders by which the Local System was established, and all amendments thereto; and all such other data and information as may be requested by the Director or by the Board of Trustees of the State System.

IN WITNESS WHEREOF, this agreement has been signed this the 27 day of December, 1971, on behalf of the County by the County Judge, attested by the County Clerk, pursuant to order duly adopted by the Commissioners Court of said County on the 27 day of December, 1971; on behalf of the Employees' Retirement System of Fort Bend County, Texas, by the County Judge, attested by the County Clerk, acting pursuant to said order of the Commissioners' Court, and by the Chairman of the Retirement Board of the Employees' Retirement System of Fort Bend County, Texas, attested by the Secretary thereof, pursuant to a resolution of said Board adopted the 28 day of December, 1971; and on behalf of the Texas County and District Retirement System by the Chairman of its Board of Trustees and the Secretary of said Board, acting pursuant to resolution duly adopted by said Board on the 16th day of December, 1971.

RE: APPLICATION FOR SOIL CONSERVATION SERVICE PROJECT ON OYSTER CREEK WATERSHED

On Motion of Commissioner J. M. Davis, seconded by Commissioner Johnnie Pustka, and duly passed, the court authorized the County Judge to sign Application for S.C.S. Project on Oyster Creek Watershed as follows:

APPLICATION FOR ASSISTANCE IN PLANNING AND CARRYING OUT WORKS OF IMPROVEMENT

UNDER THE

WATERSHED PROTECTION AND FLOOD PREVENTION ACT

TO THE HONORABLE
THE SECRETARY OF AGRICULTURE
UNITED STATES DEPARTMENT OF AGRICULTURE

The undersigned local organization(s) makes application for Federal assistance under the Watershed Protection and Flood Prevention Act in preparing and carrying out plans for works of improvement for the Oyster Creek watershed, State of Texas.

The following information is submitted in support of the application:

1. Size of watershed: 65,200 acres.

2. Location of watershed

   (a) State(s) Texas

   (b) County(ies) Fort Bend

   (c) Soil and Water Conservation District(s) Coastal Plains

   (d) Tributary of Brazos River

3. Watershed problems:

4. Types, extent and probable location of watershed treatment measures

5. Local participation

6. Status of local organization(s)

7. Non-discrimination provision:

   The program conducted will be in compliance with all requirements respecting non-discrimination as contained in the Civil Rights Act of 1964 and the regulations of the Secretary of Agriculture (7 C.F.R. Sec. 15.1-15.13), which provide that no person in the United States shall, on the ground of race, color, or national origin, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any activity receiving Federal financial assistance. (This statement must be made a part of each watershed application.)

3. Watershed Problems:

The watershed comprises about 65,300 acres of land that is drained by Flatbank, Oyster and Jones Creeks and their tributaries.

The towns of Sugar Land, Stafford and Missouri City lie within this watershed. Urban and suburban development accounts for approximately 5,000 acres and the remainder is agricultural land that is rapidly being developed.

Seven new subdivisions covering an area of over 2,000 acres were developed during the past year (1971) and are still expanding.

The watershed area contains 82 farms currently under District agreement comprising about 58,400 acres. It is estimated that about 15,000 acres in these cooperating farms extend outside the watershed. The total agricultural units in the watershed is estimated at 130 with an average size of 500 acres. The land use is chiefly pastureland.

Records indicate that slightly over 50 percent of the 58,400 acres on cooperating farms is adequately treated. It is estimated that about 40 percent of the remaining land in the watershed is adequately protected from the standpoint of cover.

The overall problem is chiefly one of flooding, which affects both suburban development and agricultural land. The ever increasing development, both industrial and residential, with the resulting decreased insoak of water, is largely responsible for the flooding conditions. Channels which were adequate for excess water removal for agriculture are now grossly inadequate. Information available indicates that rainstorms in excess of the 5 year frequency will result in considerable flooding in several of the new developments. This will result in extensive property damage and could endanger life.

Easements have been granted to Fort Bend County and the Fort Bend County Drainage District on all the aforementioned creeks, except Jones. These are rights-of way to accommodate agricultural drainage only. It is estimated that the additional rights-of-way will cost one million dollars.

4. The proposed works of improvement would entail channel enlargement of Flat Bank, Steep Bank; Oyster, Stafford Run and Jones Creeks. These creeks drain a large portion of the eastern part of Fort Bend County and finally discharge into the Brazos River below DeWalt, Texas.

The total job will require about 95-100 miles of channel improvement with 66 highway, road and railroad crossings, 21 of which are major crossings, along with 18 pipeline crossings and a possible number of minor crossings and structures.

5. Local Participation

This project will be sponsored by the Coastal Plains Soil and Water Conservation District, Fort Bend County, Fort Bend County Drainage District, and the cities of Stafford and Missouri City. The Fort Bend County Drainage District will be the prime sponsor and has the needed personnel, physical and financial facilities for carrying out needed works of improvement.

The Coastal Plains Soil and Water Conservation District will continue to work with local land users to get needed conservation measures on the land in the watershed.

The City of Stafford has passed a bond issue to supply in excess of one million dollars for drainage improvements for the city and its drainage outlet (Stafford Run Creek).

The affected subdivisions have dedicated the necessary rights-of-way to allow for needed channel enlargement. In general, all needed local participation will be supplied if the project is approved. There is generally a keen interest by landowners to get the needed flood prevention measures applied and no unusual difficulty is anticipated in obtaining the necessary rights-of-way. Condemnation procedures can be utilized if this becomes necessary.

6. Status of Local Organizations

All sponsoring local organizations are legal entities of state government with the power to tax or float bonds with the exception of the Coastal Plains Soil and Water Conservation District, which does not possess the latter powers.

Local financial needs can be met and early action by sponsoring local organizations in carrying out their full responsibilities are assured.

The prime S.L.O. has the authority under state low to carry out, maintain and operate the works of improvement in the entire county of Fort Bend.

WHEREAS, the State of Texas, hereinafter called the State, acting by and through the Texas Highway Department, proposes to make certain highway improvements on that section of the above indicated highway.

WHEREAS, the Old Ocean Fuel Company, hereinafter called the Owner, proposes to retain, locate or relocate certain of its facilities and retain title to any property rights it may have on, along or across, and within or over such limits of the highway right of way as indicated on the plans attached hereto except as provided below.

NOW, THEREFORE, it is hereby mutually agreed that joint usage for both highway and utility purposes will be made of the area within the highway right of way limits as such area is defined and to the extent indicated on the aforementioned plans or sketches. Where Owner by reason of ownership of an easement or fee title or otherwise under law has the right to alter, modify or add to facilities presently located within the area above described or construct additional facilities therein, such right is hereby retained, provided, however, if existing facilities are to be altered or modified or new facilities constructed within said area the Owner agrees to notify the Texas Highway Department prior thereto, to furnish necessary sketches showing location, type of construction, and methods to be used for protection of traffic, and if, in the opinion of the Texas Highway Department, such alteration, modification, or new construction will injure the highway or endanger the traveling public using said highway, the Texas Highway Department shall have the right, within 30 days after the receipt of such notice, to prescribe such regulations as necessary for the protection of the highway facility and the traveling public using said highway; provided further, however, that such regulations shall not extend to the requiring of the placement of intended overhead lines underground or the routing of any lines outside of the area of joint usage above described.

OWNER hereby agrees that access for servicing its facilities normally will be limited to access via (a) Frontage roads where provided (b) Nearby or adjacent public roads and streets, or (c) Trails along or near the highway right of way lines, connecting only to an intersecting road; from any one or all of which entry may be made to the outer portion of the highway right of way. Where supports, manholes, or other appurtenances of the Owner's facilities are located in medians or interchange areas, access to them from the through-traffic roadways or ramps

will be permitted but only by permits issued by the State to the Owner setting forth the conditions for policing and other controls to protect highway users. If an emergency situation occurs, and the usual means of access for service operations as herein provided will not permit the immediate action required by the Owner in making emergency repairs as required for the safety and welfare of the public, the Owner shall have a temporary right of access to and from the through-traffic roadways and ramp as necessary to accomplish the required emergency repairs.

Participation in actual costs incurred by the Owner for any future relocation or adjustment of utility facilities required by highway construction shall be in accordance with and to the extent possible under applicable laws of the State of Texas. Except as expressly provided herein, (1) The Owner's rights of access to the through-traffic roadways and/or ramps shall be subject to the same rules and regulations as apply to the general public, and (2) The Owner and the State, by the execution of this agreement, do not waive or relinquish any right which they may have under the law or Constitution, State or Federal.

In the event the Owner fails to comply with the requirements as set out herein, the State may take such action as it deems appropriate to compel compliance.

The Old Ocean Fuel Company owns, operates and maintains a 24-inch high pressure gas pipeline crossing the proposed right of way for the widening of U.S. Highway 59 in Fort Bend County near Kendleton, as shown on our attached Sketch No. G.O.-63.

It will be necessary to perform the following work without interruption of service of the 24-inch gas pipeline:

1) Remove cover from the 24" pipeline for a distance of approximately 275 feet having no more than 100 feet of the line uncovered at any time.

2) Dig out the pipe and place it on skids with maximum distance between skids not to exceed twenty feet.

3) Remove tape coating from 250 feet of pipeline and clean the pipe.

4) Retape pipe, as per Old Ocean Fuel requirements.

5) Install casing insulators on centers of ten feet spacing.

6) Install and flood coat approximately 250 feet of 30-inch casing of sub-standard grade pipe.

7) Back fill the ditch, as specified by the Texas Highway Department.

Old Ocean Fuel Company will furnish all materials except casing of which the contractor is to supply. Contractor will furnish all tools, equipment and labor.

Old Ocean Fuel Company proposes to solicit bids for the casing of the 24-inch high pressure gas pipeline of which the detailed work has been described above. The bids will be solicited to contractors, as detailed in the attached (D-15-48) Statement of Contract Work. The contractor for this project will be required to commence work within 10 days after written notice is given and is required to diligently pursue and complete the project within a period of 10 working days excepting periods of rainfall.

RE: APPROVE APPLICATION FOR ASSISTANCE ON BIG CREEK WATER SHED

On Motion of Commissioner Ed. H. Helwig, seconded by Commissioner Paul R. Wenzel, Jr. and duly passed, the court approved the application for assistance in planning and carrying out works of improvement under the Watershed protection and flood prevention act on Big Creek Water Shed, as follows:

APPLICATION FOR ASSISTANCE IN PLANNING AND CARRYING OUT WORKS OF IMPROVEMENT

UNDER THE

WATERSHED PROTECTION AND FLOOD PREVENTION ACT

TO THE HONORABLE
THE SECRETARY OF AGRICULTURE
UNITED STATES DEPARTMENT OF AGRICULTURE

The undersigned local organization(s) makes application for Federal assistance under the Watershed Protection and Flood Prevention Act in preparing and carrying out plans for works of improvement for the Big Creek watershed, State of Texas.

The following information is submitted in support of the application:

1. Size of watershed: 145,664 acres.
2. Location of watershed
   (a) State(s) Texas
   (b) County(ies) Fort Bend
   (c) Soil and Water Conservation District(s) Coastal Plains
   (d) Tributary of Brazos River
3. Watershed problems:
4. Types, extent and probable location of watershed treatment measures
5. Local participation
6. Status of local organization(s)
7. Non-discrimination provision:

   The program conducted will be in compliance with all requirements respecting non-discrimination as contained in the Civil Rights Act of 1964 and the regulations of the Secretary of Agriculture (7 C.F.R. Sec. 15.1-15.13), which provide that no person in the United States shall, on the ground of race, color, or national origin, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any activity receiving Federal financial assistance. (This statement must be made a part of each watershed application.)

3. Watershed Problems:

The problem applies to the Big Creek watershed consisting of about 145,664 acres. Dry and Seabourne Creeks, tributaries of Big Creek, drain the city of Rosenberg, population 16,181, and its outlying areas. The final outlet for Big Creek is the Brazos River.

The watershed area contains an estimated total of about 650 farms, of which 410 are under District agreement covering 92,390 acres. The average farm size is about 225 acres.

Land use in the watershed area is approximately 60 percent cropland and 40 percent grassland.

Records indicate that about 35 percent of the 92,390 acres on cooperating farms is adequately treated. It is estimated that about 30 percent of the remaining land in the watershed is adequately protected from the standpoint of cover.

The overall problem is one of flooding, which effects both the city of Rosenberg, its suburban developments and the agricultural land in the watershed. The population of the city of Rosenberg increased by 30 percent during the past several years. The new freeway, under construction, will within the next few years, virtually make Rosenberg a suburb of Houston. Thousands of acres of agricultural land in the Rosenberg vicinity have been purchased for development purposes during the past year. This ever increasing decrease in water intake area on the land is responsible for the flooding conditions. Channels which were adequate for excess water removal for agricultural purposes are now grossly inadequate. The population projection for the city of Rosenberg and its outlying area is 26,800 for 1980 and 46,000 for 1990.

Easements have been granted to Fort Bend County and the Fort Bend County Drainage District on the aforementioned creeks. These are rights-of-way to

accommodate agricultural drainage only. These will require some modifications to provide for wider rights-of-way that will be needed in some areas to take care of the increased runoff.

4. The proposed works of improvement would entail channel enlargement of Big Creek from the Brazos River to its confluence with Seabourne Creek and of Seabourne and Dry Creeks.

The total job will require about 70 miles of channel improvement, along with 30 major highway and railroad crossings. There will also be a number of minor crossings and structures.

5. Local Participation

This project will be sponsored by the Coastal Plains Soil and Water Conservation District, the city of Rosenberg, Fort Bend County and the Fort Bend County Drainage District. The Fort Bend County Drainage District will be the prime sponsor and has the needed personnel, physical and financial facilities for carrying out needed works of improvement.

The Coastal Plains Soil and Water Conservation District will continue to work with local land users to get needed conservation measures on the land in the watershed.

The city of Rosenberg will provide such assistance as it may have available at the time the work is to be done.

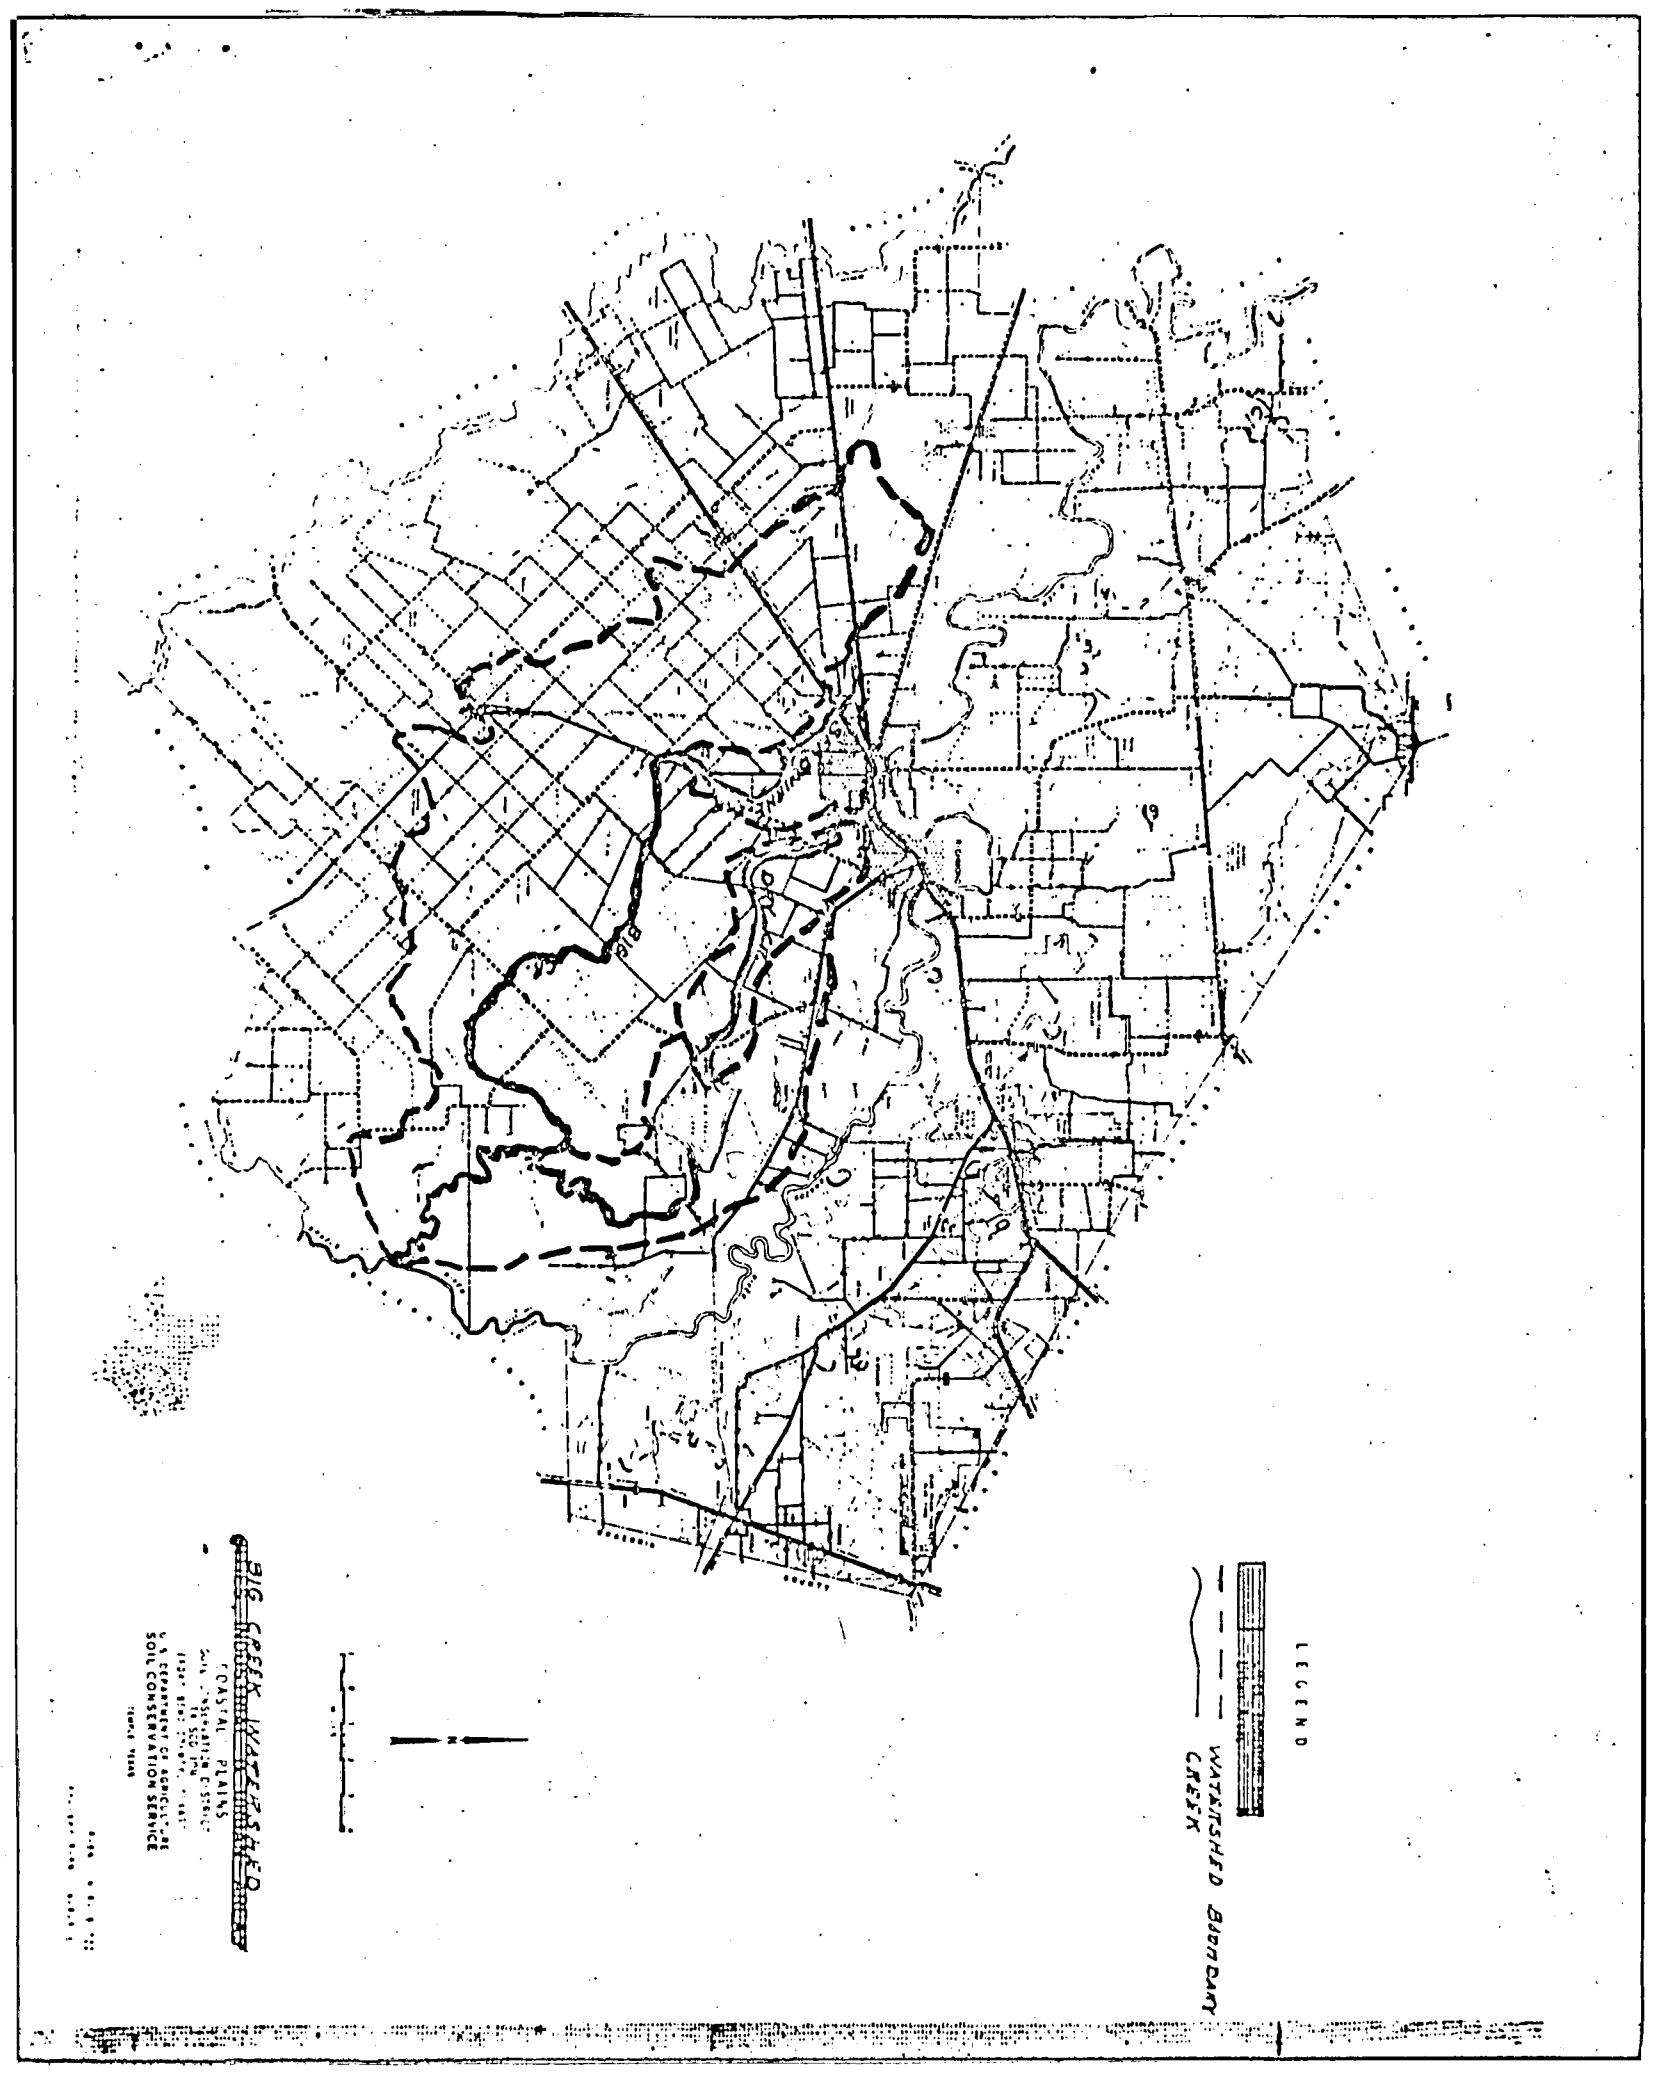

There is a keen interest by all land users to get the needed flood prevention measures applied and no difficulty is anticipated in obtaining necessary rights-of-way. All needed local participation will be supplied if the project is approved. Condemnation procedures can be utilized if this becomes necessary.

6. Status of Local Organizations

All sponsoring local organizations are legal entities of state government with the power to tax or float bonds with the exception of the Coastal Plains Soil and Water Conservation District, which does not possess the latter powers.

Local financial needs can be met and early action by sponsoring local organizations in carrying out their full responsibilities are assured.

The prime SLO has the authority under state law to carry out, maintain and operate the works of improvement in the entire county of Fort Bend.

There being no further business, the Court adjourned.

STATEMENT OF WORK

4" BARB MAG LATERAL #5-A

STATEMENT OF WORK TO BE PERFORMED

The following Statement of Work covers all work to be performed by TEXAS EASTERN TRANSMISSION CORPORATION in connection with the proposed State Highway 59 widening project which crosses Texas Eastern's 4" Line #5-A at M.P. 7.62 and Texas Highway Department Station 347+46.

The existing pipeline will be cased and lowered approximately 5 feet at the highway crossing site. This lowering will place the pipeline a minimum of 3 feet below the bottom of the proposed ditches, and 7 feet below natural grade as requested.

This installation is detailed on the attached Drawing TD-4-287, Sheet 1 of 1.

The proposed work will consist of Texas Eastern's moving in equipment and material to the job site, lowering and casing the pipe, make the final inventory, cleap up the job site, move out equipment and excess material, prepare as-built drawings and completion reports and submit the final billing to Fort Bend County, Richmond, Texas 77469.

It is estimated that the total time for field work including move-in and move-out will be a total of twelve ten-hour working days to complete this installation.

All aforementioned utility adjustment work will be performed by Texas Eastern's company personnel with existing field conditions and factors to govern. An invoiced piece of rental equipment used will be submitted with the final billing.

Texas Eastern will request reimbursement for the actual costs encountered.

STATEMENT OF WORK

PRELIMINARY COST ESTIMATE

16" LINE NO. 5
M.P. 44.17

STATEMENT OF WORK TO BE PERFORMED

The following Statement of Work covers all work to be performed by TEXAS EASTERN TRANSMISSION CORPORATION in connection with the proposed State Highway 59 which crosses TEXAS EASTERN's 16" Line No. 5 at M.P. 44.17 and Highway Station 194+43.4. This section is covered by Texas Highway Department's Account No. 8012-1-12.

The existing pipeline will be relocated across the right-of-way proposed and lowered approximately 4.2 feet to provide approximately 7 feet of cover between natural ground elevations and the top of the proposed casing. This will also provide approximately 3.9 feet of cover between the bottom of the proposed ditch grade and the top of the casing.

This installation is detailed on Drawing TF-4-182, sheet 1 of 1.

The proposed work will consist of Texas Eastern's moving in equipment and material to the job site, fabricating the section of pipe for the relocation and lowering with casing installed, hydrostatically testing the fabrication for 24 hours, perform the installation, make the final inventory, clean up the job site, move out equipment and excess material, prepare as-built drawings and completion reports, and submit the final billing to Fort Bend County, Richmond, Texas 77469.

It is estimated that the total time for the entire actual field work including move-in and move-out will be a total of eighteen ten-hour working days to complete this installation.

All aforementioned utility adjustment work will be performed by Texas Eastern's company personnel with existing field conditions and factors to govern. An invoiced piece of rental equipment used will be submitted with the final billing.

Texas Eastern will request reimbursement for the actual costs encountered.

Dear Sir:

In the construction of the underpass at the intersection of U. S. Highway 59 and F. M. 762 on the subject project, the plans call for the discharge from the pumphouse to be by means of a 72" pipe part of the way to Rabbs Bayou and the remainder to be a concrete lined ditch. Since construction has started on this project, it has been determined that it will be necessary to line a portion of Rabbs Bayou to prevent erosion to this stream. In order to make the stockpass, which was granted to the Mamie E. George Estate, function, it will be necessary to place 22.5' of 72" pipe, as shown on the attached sketch, at the lower end of this outfall channel, as neither vehicles nor stock would be able to negotiate this concrete lined ditch.

Reference is made to the stockpass permit covering Parcels 102-A, 102-B, and 102-C on the subject project. In paragraph 7 of said stockpass permit, Fort Bend County agrees to pay for any work performed by the State in the initial installation and any amount established for work performed by the State for any modification which may become necessary in the construction of this stockpass. The additional work necessary to place this 22.5' of 72" concrete pipe is $956.25. It will be necessary to have a check payable to the State Treasurer Account, Account of Trust Fund No. 927, prior to the beginning of this work.

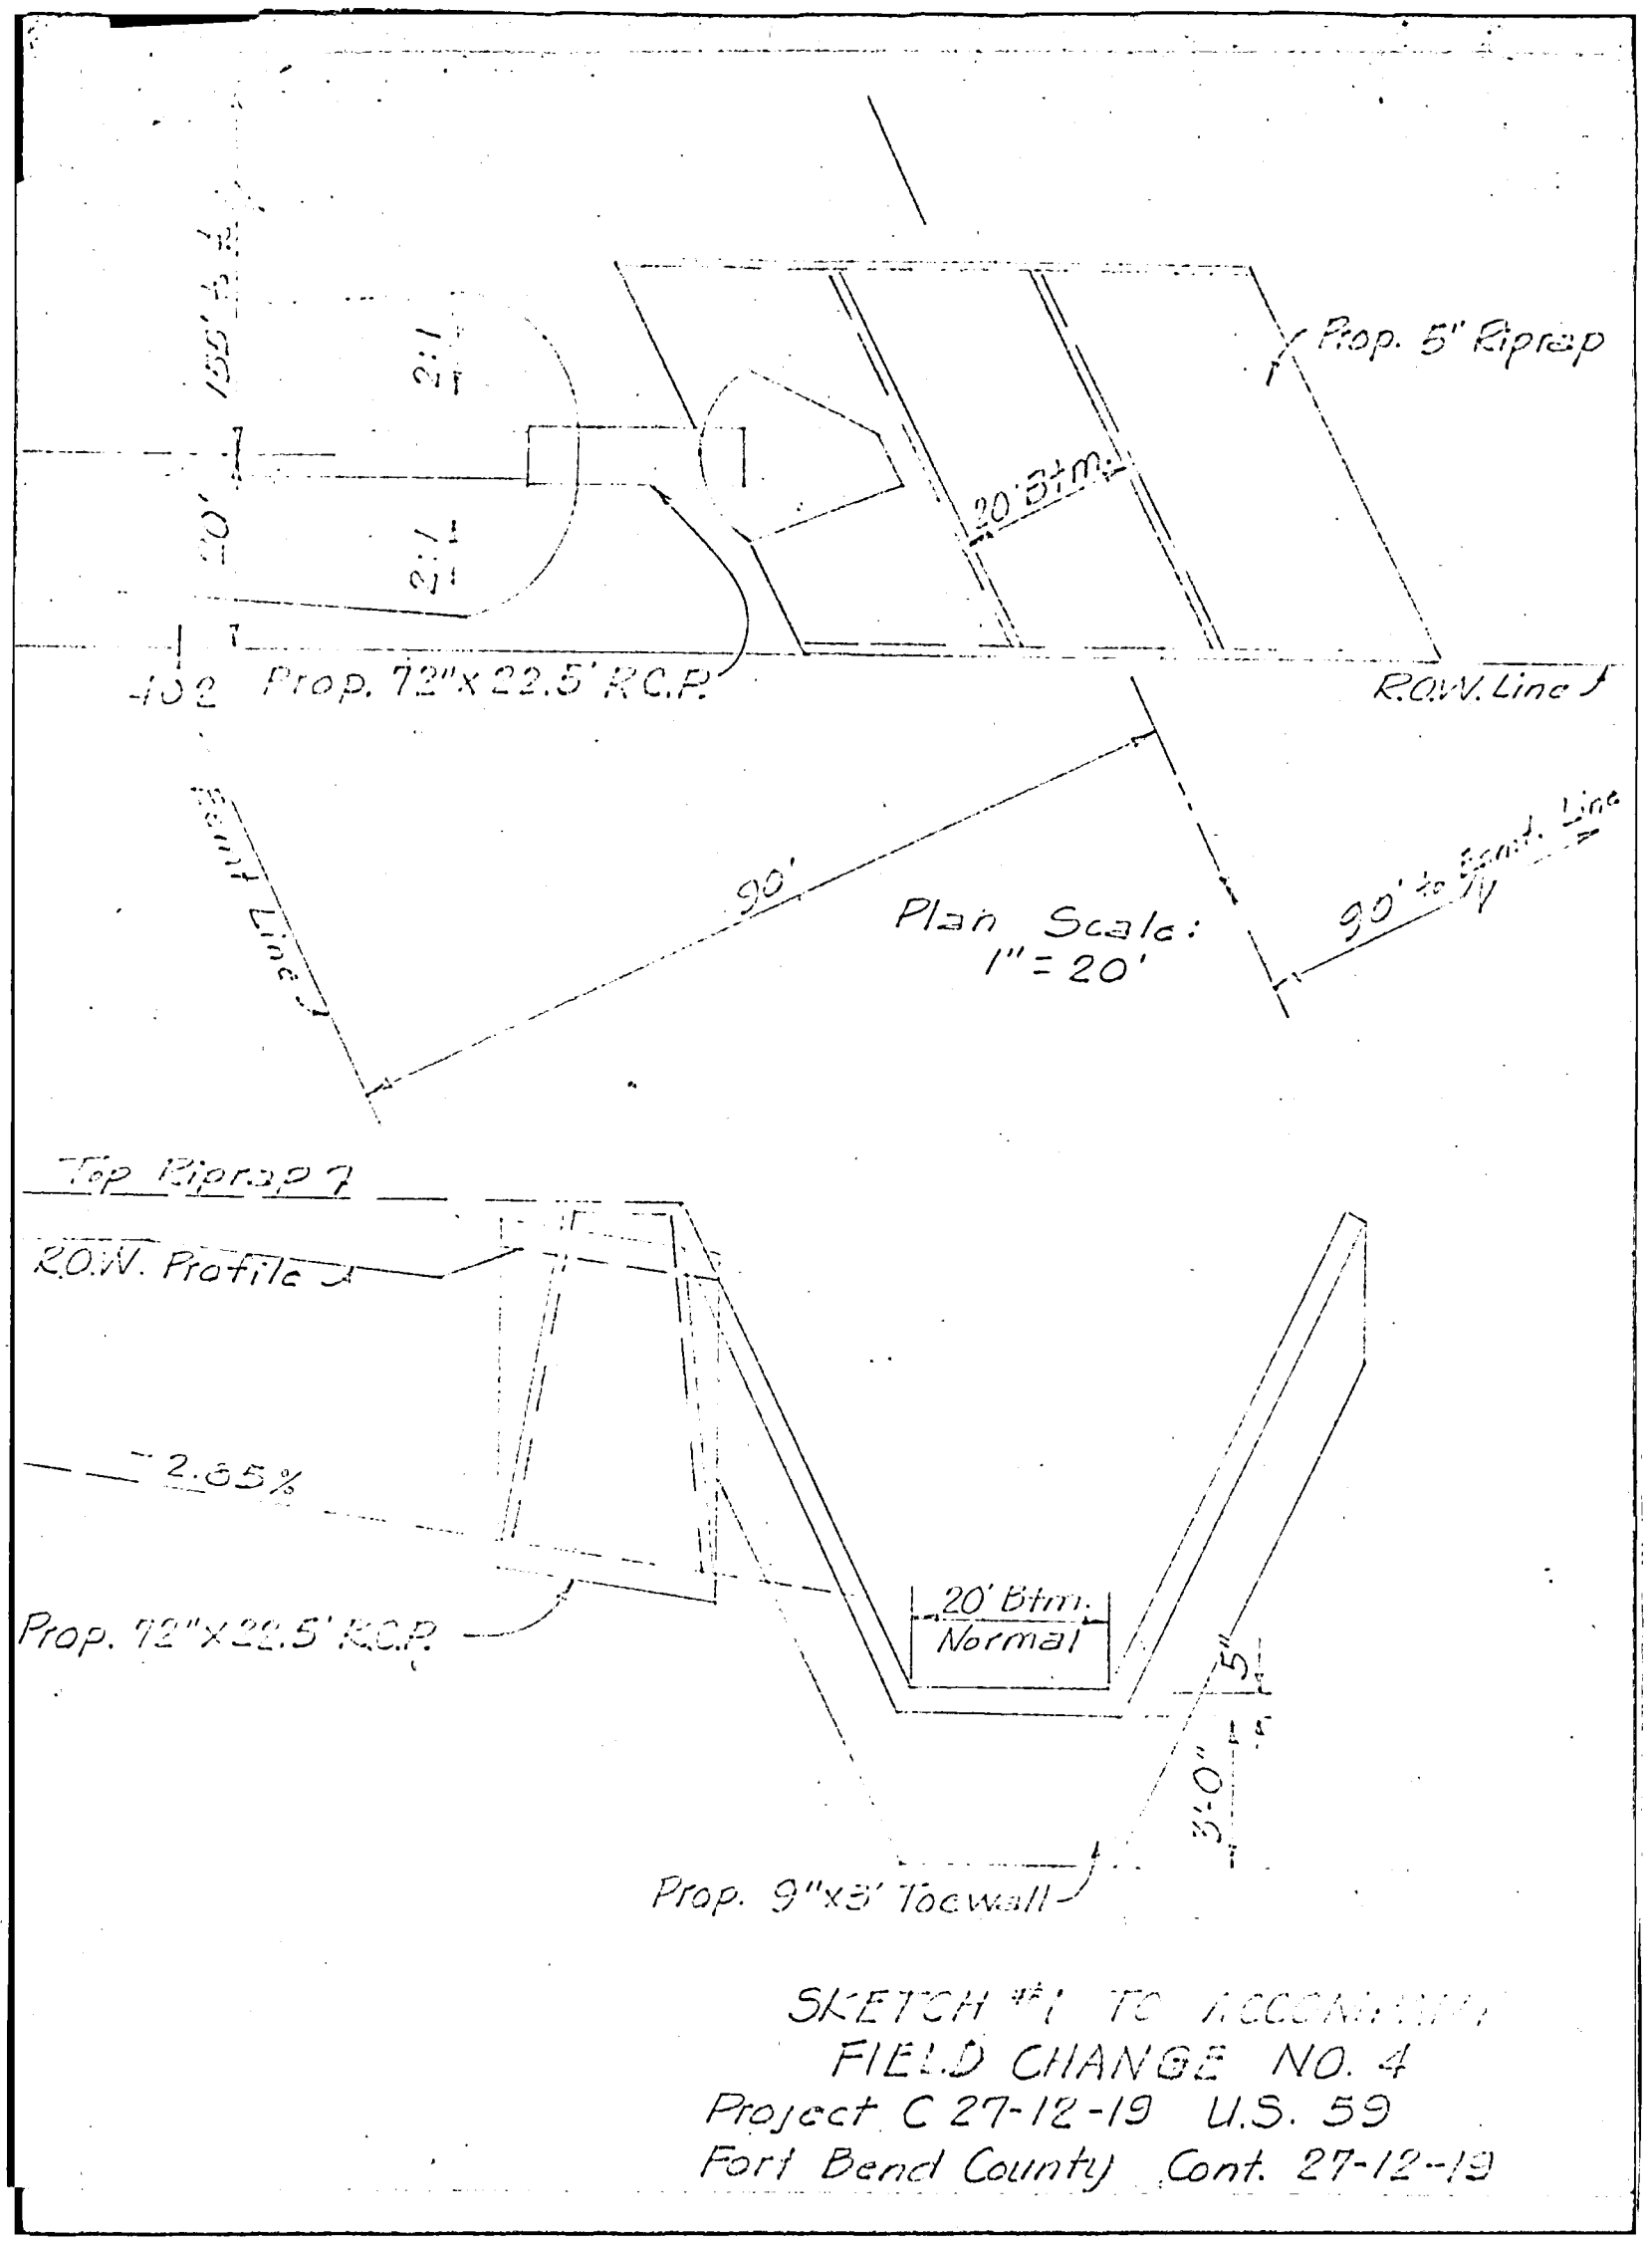

If any further information is needed in this matter, please advise.

Yours very truly,

William A. Clark
Supervising Resident Engineer

GRANTING PIPE LINE CROSSING

TO THE HONORABLE COMMISSIONERS' COURT
AND COUNTY JUDGE, FORT BEND COUNTY, TEXAS

COMES NOW DOW PIPE LINE COMPANY, a Texas corporation with an office at 3636 Richmond Avenue, Houston, Texas, 77027, acting herein by and through its duly authorized representative, and hereby petitions your Honorable Court for the right to lay a pipe line under and across certain roads, ditches, drainage canals or highways as shown by the plats attached to the executed copy hereof on file in the County Judges' office and the Drainage District Engineers' office of Fort Bend County.

Petitioner further agrees to obey all rules of the County Commissioners and its Engineer in the construction, and to notify the County Commissioner in the Precinct, 48 hours before beginning work under the permit and when work is completed to notify the Commissioner so he can inspect the work while construction equipment is still available for any necessary additional work.

Petitioner further agrees to save the County harmless from any action arising out of the laying, maintenance or operation of said pipe line.

A Bond is required to be in force during the construction period and for one

year thereafter to assure that the area is returned to and remains in its previously existing condition.

RE: PASS RESOLUTION TO HOLD OPEN SAN BERNARD RIVER PROJECT

On Motion of Commissioner Paul R. Wenzel, Jr., seconded by Commissioner Johnnie Pustka,

and duly passed, the Court authorized the County Judge, Josh Gates to sign a letter to Board of Engineers for Rivers and Harbors Corps of Engineers Department of the Army, Washington, D.C., as follows:

Re: DAEN-BR
San Bernard River, Texas

Reference is made to the Board's letter of May 22, 1972, which granted an extension of the response period for the report of the above referenced project to November 18, 1972.

At this time Fort Bend County does not have additional information which would materially change the cost-benefit ratios on the San Bernard River Project. We have asked Hudson Products, Inc., to submit to you an estimate on the benefits to them from a flood control project on Turkey Creek, which is a Tributary of the San Bernard River. With tremendous growth in the Fort Bend County-Wharton County Area, we feel the situation will change rapidly in a short time and the cost-benefit ratio would justify this project.

We suggest that the San Bernard River Project be held open to see if the additional growth and development would not justify a change in the very near future. We appreciate the cooperation of the Corps of Engineers in this and other projects which affect Fort Bend County.
