RE: RESOLUTION OPPOSING ADDITIONAL AUTHORITY FOR OPERATION OF FOR HIRE MOTOR VEHICLES TO TRANSPORT CHEMICALS AND ACIDS.

At a Special Meeting of the Commissioners' Court in and for Fort Bend County, Texas, held on this the 7 day of November, 1949, the subject hereinafter referred to was considered:

WHEREAS, this court has been informed that the Railroad Commission of Texas has granted to certain motor carriers the authority to transport certain chemicals and acids between all points in Texas, during the course of which highways in this county will be traversed; and

WHEREAS, this court is of the opinion that the lives and property of residents of this county will be unduly endangered by the transportation over the highways of chemicals and

acids which are inflammable, explosive or corrosive; and

WHEREAS, the highways of this county are already congested and are being unnecessarily deteriorated by heavy truck transportation and additional truck transportation through this county will be detrimental to the interests of the residents of this county:

NOW, THEREFORE, BE IT RESOLVED by the Commissioners Court of Fort Bend County, Texas, that it is opposed to the granting of authority by the Railroad Commission of Texas to motor carriers to transport chemicals and acids over the highways of this county:

RE: RESOLUTION OPPOSING ADDITIONAL AUTHORITY FOR OPERATION OF FOR HIRE MOTOR VEHICLES.

At a Special meeting of the Commissioners' Court, Fort Bend County, held at Richmond, Texas, on the 7 day of November, 1949, there being brought up for consideration notices received from time to time of applications filed with the Railroad Commission of Texas, by persons or firms seeking to engage in the transportation of commodities for hire proposing to traverse the highways of this county, and

WHEREAS, it is the opinion of this Court that the highways of this county are at present congested by vehicular traffice to the extent that any additional authorized use by for hire trucks of said highways will unreasonably interfere with the use of said highways by the general traveling public and increase the danger fromthe use thereof, and

WHEREAS, there is presently operated over the highways of this county a large number of commercial vehicles in private and for hire service,it is the considered judgment of this Court that the granting of additional permits or certificates for the operation of vehicles in for hire service at this time would serve no needed public convenience, and

WHEREAS, it is the opinion of this Court that in consideration of the present density of traffic on the highways of this county, that the Railroad Commission of Texas and any other regulatory bodies having jurisdiction should decline to grant any additional permits or certificates for the further use of said highways, except upon a clear showing of Public necessity and convenience.

THEREFORE, it is ordered by this Court that the Clerk of the Court file a copy of this resolution with the Railroad Commission of Texas, Austin, Texas, as evidence of the opposition to the granting of additional authorities for the operation of for hire motor vehicles over the highways of this county, except upon absolute proof of public necessity and convenience.

Motion made by Commissioner Wirtz, seconded by Commissioner Kovar and duly carried that the foregoing resolution be adopted.

RE: FORT BEND COUNTY DRAINAGE DISTRICT.

The Commissioners' Court met with the Directors of the Soil Conservation District. The following plan of operations and working agreement was made and entered into by Fort Bend County Drainage District and the Soil Conservation Service and the Coastal Plains Soil Conservation District, as follows, to-wit:

A. Definition of Terms:

In this operations plan the following words or expressions shall be understood to have the meanings given below:

"Drainage District" - The Fort Bend County Drainage District, Texas, or its duly authorized agent.

"Soil Conservation District" - The Coastal Plains Soil Conservation District, specifically the Board of Supervisors, Rosenberg, Texas, or its duly appointed agent, referred to as the "Representative".

B. Location of Work:
The Coastal Plains Soil Conservation District, as well as the Fort Bend County Drainage District, includes all of Fort Bend County, Texas, which covers approximately 555,000 acres, more or less.

C. Description of Work:
The Work covered by this Plan consists of the rehabilitation of the drainage system of the Drainage District. The Report of the Drainage Survey of the Coastal Plains Soil Conservation District contains descriptions of the drainageways in the Drainage District with estimates of

quantities of work necessary to correct these conditions which are contributing to theinadequacy of the system. This report shall be used initially to locate and describe streams and their limits.

All work described in the Report of the Drainage Survey of the Coastal Plains Soil Conservation District is considered necessary to complete the drainage system of the Drainage District. Individual farmers are expected to drain their own lands and/or groups of farmers on drainageways having up to 320 acres in area are expected to work together with the Soil Conservation District to drain their lands. Ranchers and/or group of ranchers on drainageways having 640 acres in area are expected to work together with the Soil Conservation District to drain their lands.

The Drainage District will improve all remaining drainageways financed by a $2,172,000 bond issue, plus an annual maintenance fund of a 25 cents tax per 100 dollars valuation. The Drainage District will seek all available assistance of the Department of Army, Corps of Engineers on major drainageways.

The Drainage District anticipates the improvement of the major drainageways by the Corps of Engineers on drainageways exceeding 10 square miles in area.

The Soil Conservation District will furnish the services of a Drainage Engineer in an advisory and consulting capacity. He will be technically responsible to maintain engineering standards and specifications.

The Drainage District will employ private engineers to survey, plan, design and supervise construction of drainageways within watersheds which are above the major drainageways to be improved by the Corps of Engineers.

The Soil Conservation District will furnish the Drainage District engineering supervision of surveys, plans, designs and construction on smaller drainageways which are not to be improved by the Corps of Engineers, but which are to be improved with Drainage District funds. The Drainage District will furnish other engineering aids, equipment and materials needed to complete this engineering work.

The Soil Conservation District will furnish the use of aerial photographs to the Drainage District, plus all other maps and engineering data on file. This material is to be used only in the office of the Soil Conservation District.

The Soil Conservation District will furnish the Drainage District a reconnaisance soil groups map with a description of such major soil group.

The Soil Conservation District will furnish a general land capability table which classifies the different kinds of land based on the ability of the land to produce permanently when properly used and scientifically treated according to its need.

The Soil Conservation District will furnish the Drainage District estimates of the annual benefits to agriculture based on records of farmers and ranchers cooperating with the soil conservation district for the past three years resulting from drainage and soil conservation work. This data can be used to estimate annual benefits to the agriculture of the entire district.

The Soil Conservation District will furnish the Drainage District with copies of the District Program and Work Plan which was compiled by 140 local people over a three-year period. General physical, economic and social conditions are included, plus recommendations for the improvement of all agricultural conditions in the Soil Conservation District.

Drainage Ditch designs will be based on the Drainage Runoff Curves (attached hereto) for appropriate range land, rice land or coastal area, plus the use of Manning's formula with comparative values of "n" determined and illustrated in USDA Technical Bulletin No. 129, "Flow of Water in Drainage Channels". Drainage Ditch Specifications (attached hereto) are to be considered as minimum specifications for design and construction purposes. Drainage design information including runoff, formulae and specifications are the same as those included in the Coastal Plains Soil Conservation District Work Plan and the Report of the Drainage Survey of the Coastal Plains Soil Conservation District, Texas.

D. Construction Schedule

The Drainage District will keep the Soil Conservation District currently informed on the scheduling of planning and construction work, including public and private work. The Soil Conservation District will assist the Drainage District in scheduling such work; however, the actual scheduling of the work and equipment will remain the prerogative of the Drainage District; however, in order to arrange for orderly and efficient use of the technical personnel and equipment, the Soil Conservation District Representative will meet at least monthly with the Drainage District to keep informed on the progress of all work of the Drainage District.

It is understood that all major drainageways will be improved from the outlet upstream. No lateral ditches will be improved until adequate drainage ditch outlets are completed to the point of discharge of the lateral ditch.

The Drainage District will furnish construction cost data monthly on each watershed to the Soil Conservation District, including quantities of excavation, spreading of spoil banks, fencing, clearing, grubbing, watergates, bridges culverts and other construction work performed.

E. Rights-of-Way:

Rights-of-Way for all existing ditches are vested in the Drainage District. The Drainage District is empowered by State law to acquire such additonal right-of-way within its boundaries as the scope of the work may require in extending the main system or in constructing laterals to serve individual farms.

F. Rehabilitation and Maintenance Costs

The Drainage District ad valorem tax is limited to 25 cents per $100.00 valuation. The Drainage District has assumed the assets and liabilities of existing Drainage District which were dissolved by the Fort Bend County Drainage District Act. The voters have approved the maintenance tax.

The Drainage District will start work immediately to determine assets and liabilities and re-

habilitate the existing drainage system when outlets are available with maintenance funds.

G. Cost Estimate

The cost estimates will be developed progressively by the Drainage District. The Soil Conservation District will furnish assistance to collect and compute these costs, including the correlation of costs of all contributing agencies for the Drainage District.

H. Maintenance Program

Final determination as to the continuing type of maintenance to be followed on the main ditches and laterals has not been made. Consideration is being given to the adaption of some means of control by use of poisoning and/or burning. A committee composed of representatives of the Drainage District and the Soil Conservation District will make further study of this problem prior to making of final recommendations.

Where conditions permit, individuallandowners will be encouraged to graze, mow, poison, or burn the vegetation in the lateral and main ditches.

A minimum of two inspections per year will be made by representatives of the Drainage District, accompanied by the engineer assigned to the Soil Conservation District to determine the amounts and types of work to be done.

Annual maintenance will be performed by the Drainage District and will include, but not be limited to, the removal of excessive or undesirable channel growth, silt and debris accumulations.

I. Construction Plans

The Drainage District will obtain design and engineering plans, profiles and cross -sections from the Corps of Engineers, private engineers and the Soil Conservation District.

The Soil Conservation District Drainage Engineer will check and correlate all design and engineering plans and profiles for the Drainage District.

Construction plans will be developed concurrently by the Corps of Engineers, private engineers and Soil Conservation District as rapidly as facilities permit.

J. General Specifications

Intent of Plans and Specifications: The true intent of all plans and specifications is to provide for the execution and completion of the work described in a workmanlike and satisfactory manner.

Deviation from the Plans: Deviations from the plans and specifications will be with the concurrence of the Drainage District and the Soil Conservation District.

Coordination of Specifications and Plans: As it becomes necessary to supplement the plans and specifications, the supplemental plans and specifications will become a part of this Plan and in case of conflict, will take precedence over the present plans and specification.

Right to Change Location and Plans: If it is desirable to change the alignment, dimensions or designs of drainage ditches or appurtenant works to conform to conditions that develop as the work progresses, the Soil Conservation District will confer with the Drainage District and will be governed by its decision.

Authority of the Soil Conservation District: All work done under the authority of this agreement will be accomplished under the technical advisement of the Soil Conservation District with the concurrence of the Drainage District.

Clearing, Removal and Disposal of Trees and Brush: Trees and brush are to be removed from the channels and placed clear of the area presently occupied, or to be occupied by drains, berms and spoil banks.

Replacement of Fences: Fences removed during construction will be replaced by the appropriate landowner. An effort will be made in each instance to have the landowner involved replace the fixed fences with watergates.

Equipment: The Drainage District and the Soil Conservation District will amend this Plan of Operation as soon as equipment is purchased by either District.

Excavation and Fill: All excavation and fill shall be made or deposited to the lines and grades established. All machine excavated material, spoil banks or berm, and side slopes of the drains shll be constructed with reasonably uniform surfaces so that maintenance work will be facilitated.

New spoil banks will not be deposited in peaks, but will be flat and wide enough on top to permit the operation of bulldozers. The spoil banks will be broken at regular intervals and at depressions to permit side drainage.

The lower 100' of each lateral will be curved downstream so as to enter the main ditch at an angle of approximately 30 degrees. The lower 40' of each lateral will be excavated to the level of the main ditch.

The recommended maximum allowable undercutting will be 0.1 foot and overcutting 0.4 foot.

K.The Soil Conservation District Will:

Furnish the assistance of a Drainage Engineer, automotive and office equipment, including available aerial photographs, maps and charts.

L. The Drainage District Will:

Construct the drainage system in accordance to design based on drainage runoff curves, formulas and specifications heretofore mentioned.

Furnishnecessary engineering aids, draftsmen, office and field supplies and equipment needed to

complete the drainage plans.

Furnish the Soil Conservation District reasonable facilities for obtaining such information respecting the progress of the work, including information necessary to determine its cost, such as the number of men employed, their pay, the time during which they worked on the various classes of construction, various equipment operating costs, etc.

Observe and comply with all Federal and State laws affecting the conduct of the work, and shall save harmless the Soil Conservation District and all its officers, agents and servants against any claim or liability arising from or based on the violation of any such laws, whether such violation be by the members of the Soil Conservation District, its employees or agents, unless such violations are willful or done with intent.

The Drainage District shall provide, erect and maintain all necessary barricades, danger signals and signs and shall take necessary precaution for the protection of the work and the safety of the public.

RE: AGREEMENT WITH TEXAS COMPANY

Upon motion of Commissioner Kovar, seconded by Commissioner Teykl, and duly carried, the County Judge was instructed to write the Texas Company that the agreement proposed in their letter of February 17, 1950, concerning the matter of Big Creek with a bridge would be acceptable, which letter follows:

The District Engineer

Corps of Engineers

Galveston, Texas

Dear Sir:

For your information, we have constructed a 40-foot creosote bridge over Big Creek, Fort Bend County at about Station No 33 on said creek with an elevation of 68 feet at a point about 9 miles south of Richmond.

We were advised by Judge Cecil Baker of Fort Bend County that we should have submitted an application for a permit to construct said bridge since Congress had granted the Corps of Engineers jurisdiction to make surveys, plans, and require plans to cross streams under a flood control measure covering counties along the Texas Coast.

We were also advised by Mr. Henry Steincamp of the Soils Conservation District of Texas, Rosenberg office that our bridge as constructed was inadequate as to elevation and length to meet proposed cleaning, widening, and other requirements.

We wish to advise you that since the bridge is complete with the exception of the flooring, we will let the contractor complete his work.

However, we wish to work in harmony with the county, district, and national flood control agencies. We will agree to raise and extend the length of the present bridge to meet your requirements when and if the project is definitely authorized by the U. S. Congress. We request a 90-day notice before your department begins operations in order that we may comply with our agreement.

Please advise us whether or not this arrangement meets with your approval.

Yours very truly,

RE: DRAINAGE DISTRICT POLICY

A conference was had with the Drainage District engineers and the supervisors of the Coastal Plains Soil Conservation District, and the Directors of the Fort Bend County Drainage District, at which time the following statement of principles and policy for the operation of the Fort Bend County Drainage District was adopted.

THE STATE OF TEXAS,

COUNTY OF FORT BEND,

BE IT REMEMBERED that on the 13th day of June, A. D. 1950, the Directors of the Fort Bend County Drainage District, in conference with the supervisors of the Coastal Plains Soil Conservation District, met in joint conference, and after full idscussion, the Fort Bend County Drainage District did adopt the following statement of principle and policy to be followed in the development and execution of an agricultural drainage program for Fort Bend County

1.

While the official responsibility and direction of the Drainage District lies within the jurisdiction of theCommissioners' Court of said county, the members of said court being the directors of the Fort Bend County Drainage District, the supervisors of the Coastal Plains Soil Conservation District shall act as a board of advisors to the Directors of the Drainage District in the capacity and according to the terms of that certain working agreement made and executed by the Directors of the Fort Bend County Drainage District and supervisors, bearing date of the 28th day of November, A. D. 1949, and appearing of record in Volume V, page 105 et seq. of the Minutes of the Commissioners' Court, reference to which agreement is here made for all purposes.

2.

It is here recognized that a tentative working agreement has been made with the U. S. Corps of Engineers, Department of the Army, with the view of their opening up certain major drainageways, and to this end, the Drainage District and Soil Conservation District pledge their active cooperation.

3.

The Drainge District program shall be developed and executed without reference to commissioner precinct lines or any other political subdivisions of the county, and the drainage program shall be developed and executed as a co-ordinated program with the county considered as a whole.

4.

In the development and execution of the drainage program, consideration shall be given, where appropriate, to the general health and welfare of the public, wild life, the protection of the county roads and bridges, and all other matters incidental thereto that may be affected either favorably or adversely by the drainage program, keeping in mind that the primary purpose of the drainage program is the reclamation and drainage of its overflowed lands and other lands needing drainage.

5.

The State Highway Department, the several railroads in the county, the several irrigation companies in the county, will be requested, as may be deemed appropriate, to make adequate any presently existing structures which are deemed to be inadequate to reasonably carry the anticipated water runoff as calculated by the Drainage District engineers.

6.

T:he owners of oil and gas lines or any other underground over overhead installations, of whatever type or character, will be likewise requested, as may be deemed appropriate, to lower, replace, relocate, or remove any such structures that may be deemed to unreasonably impede or interfere with the drainage district program.

7.

The inadequate structures on public roads and road ditches, excluding federal or state highways and farm-to-market roads, shall be made adequate by Fort Bend County or the Drainage District.

8.

The plans and designs of the Drainage District system shall include the rehabilitation of all main drainage ways and lateral drainage ways draining more than 320 acres of crop land or more than 640 acres of pasture land.

9.

Easements taken in the name of the district will be required on all drainageways of whatever size on which work is proposed to be done by either the U. S. Corps of Engineers, or the DRainage District; said easements shall specify sufficient width of right of way to carry on the anticipated drainage construction in the particular area allowing room for spoiled dirt and berm, and said easements and right-of-way shall, among other things, provide the following:

a. The spoil dirt shall be spread in a uniform manner so as to facilitate maintenance by mowing, grazing, or cultivation, as may be appropriate.

b. The easements shall include only those rights necessary for the carrying out of authorized functions of the Drainage District, and except for such rights, the fee simple title to land shall not be disturbed.

c. The Drainage District will clear all drainage rights of way of trees, logs and brush and remove or stack and burn same.

10.

The Drainage District shall acquire easements for drainage ways draining less than 320 acres of crop land and less than 640 acres of pasture land, where such additional easements are for any reason deemed expedient.

11.

The development of the drainage program and the construction of the drainage system shall in all instances conform to sound engineering principles and practices, and the following

factors shall be considered in determining the priority and order of work:

a. Adequacy of the ultimate outlet.

b. The securing of all required easements at no cost to the district.

c. The number of persons to be benefited and the amount of probably loss to be sustained in the absence of the construction under consideration.

d. Convenience and economy from the standpoint of management and construction.

A drainageway stream or ditch, will be considered an adequate outlet if the ultimate discharge is large enough to carry the expected runoff in accordance with the drainage criteria hereinafter set forth in particular under paragraph #14.

12.

Reference is here made to that certain index map file No. BRAZ 503-206 Plate 1, reference to which map and the dileneations of water sheds thereon is herein made for clarification of the policy hereinafter following:

The Drainage District engineers will be responsible for the performance of all engineering services required by the Drainage District in those water sheds in which the Corps of Engineers have manifested an interest, said Drainage District engineers being the firms of Freese, Nichols and Turner, and S. A. Russell, reference to their contract of employment being here made for all pertinent purposes. The Drainage District, independent of the services of the district drainage engineers, as aforesaid, shall be responsible for all engineering services in those water sheds in which the Corps of Engineers have not manifested an interest, such water sheds being hereinafter referred to as "fringe areas". Recognition is here made of that portion of the agreement heretofore executed and mentioned above with the Drainage District and the Supervisors of the Coastal Plains Soil Conservation District, as parties, wherein the Coastal Plains Soil Conservation District agreed to furnish the services of one drainage engineer. It is contemplated that a field party or parties be operated directly by the district under the supervision of said drainage engineer so furnished by the Soil Conservation District, in the development of the required engineering in said "fringe areas".

13.

All possible engineering data presently existing will be compiled by the Drainage District, and utilization thereof shall be made by the district.

14.

The Drainage District has adopted the following drainage criteria:

The drainage ways will be designed to remove a net 3" of runoff in 24 hours on general crop land, 2" net runoff in a like period on rice land, and a 1" net runoff in a like period on ranch land. The runoff curves for crop land, rice land, and ranch land as developed by the Soil Conservation Service has been adopted, the curves being developed from the following formula for each of the above types of land, respectively:

$$Q = 45M^{5/6}$$
$$Q = 22,5M^{5/6}$$
$$Q = 15M^{5/6}$$

wherein Q equals runoff in terms of cubic feet per second; M represents the water shed in terms of square miles. The Q factor will be increased 20% to allow for siltation and stabilization during the first year. The computation of velocities and the capacity of present drainage ways shall be computed by use of the Manning formula of $V = \frac{1.486}{M} X R^{2/3} X S^{\frac{1}{2}}$. Designed velocity will not exceed 2.5 feet per second in the sandy soil, and 4 ft. per second in clays and clay loams. Appropriate roughness coefficient will be assigned in computing velocities.

Both the stability of the soil and proposed methods of ditch maintenance shall be considered in selecting the proper slope for ditch banks, except in rare cases where deviation can be justified.

15.

County Road bridges will be constructed to span drainageways and have the same or larger cross sectional area as the drainage way itself, and culverts will be designed to carry one and one-half times the discharge of the drainageways.

16.

Appropriate types of drop structures will be installed where necessary to prevent or arrest serious gullying near the outlet ends of drainage ways. These types will include reinforeced concrete paved ramps, corrugated metal pipe drop inlets and sod flumes.

Sod flumes will be installed on well prepared grades and fertilized. Bermuda grass or some other sod forming grass will be used. There should be at least 4" of soil on the sod strips or chunks.

Corrugated metal pipe structures will be built with treated pipe of a gauge which at least meets Highway Department recommendations for the height of fill that will be over it. All pipe should be double riveted.

17.

The Drainage District will replace existing fences where they cross main or lateral drainageways, and install swinging water gates. Drainageways crossing crop lands will be fenced where maintenance thereof can be materially assisted by grazing, and the Drainage District will remove and replace presently existing fences where necessary to construct drainageways. Such fences will be replaced in as good or better condition as the existing fence. Swinging water gates will be constructed of good quality treated lumber and supported by pipe or cable.

Line fence posts will be set at least two feet in the ground and corner posts at least 3 feet. All corners will be adequately braced.

18.

Ditches up to 6 feet in depth will have a berm width of at least 10 feet. Ditches over 6 feet in depth will have a berm width of at least 15 feet.

19.

Ditch inlets will be recessed by excavated the last 50 to 100 feet of the ditch bottom to the same elevation as the bottom of the ditch it enters.

The best practical alignment of drainageways will be made. Primary consideration will be given to the following of natural depressions; however, subsidiary consideration will be given to economic and practical cutoffs, property lines, and public road ditches.

20.

The Drainage District shall not divert runoff water from one water shed to another, and existing diversions will be continued only where the cost of maintenance thereof will not exceed the cost of taking the water runoff through the natural drainage course or water shed.

21.

Excavation shall be begun at the outlet point of all drainageways and progress upstream. All excavations will be made to the lines and grades shown on the construction plans. The maximum allowable undercutting will be .2 ft. and overcutting .4 feet. All inlets will be excavated as they are reached. When practical, lateral ditches will be turned down stream to enter main ditches at an angle of 30 degrees. The length of transition sections when changing from one ditch size to another will not be less than 100 feet.

22.

Spoil banks in cultivated fields will be spread unless there are special instances where spreading would not be desirable. Such instances must be justified. In pasture areas, the spoil bank will be shaped so that mowing will be possible, and erosion will be negligible. All spoil banks will be broken at intervals to provide entry of side drainage.

23.

In order to expedite the beginning of actual construction of the drainage system, the Drainage District will negotiate with the U. S.Corps of Engineers such amendments and laterations of present commitments from the Corps of Engineers, to allow such early beginning of work.

24.

The Drainage District will negotiate with the appropriate political subdivisions outside of Fort Bend County on the most favorable terms possible in attempting to effect a solution of drainage problems in watersheds whose boundaries extend beyond the boundaries of Fort Bend County.

25.

All drainageways and appurtenances will be maintained to insure efficient operation of the system. The maintenance program will be conducted on at least an annual and on an emergency basis. Systematic inspections will be conducted to determine types and amounts of work needed. Emergency inspections will be made after periods of excessive rainfall to locate and determine types of work needing immediate attention.

The maintenance program shall consist of three phases: (1) Control of vegetative growth. (2) The removal of sand and silt deposits and drifts. (3) The repair of any damaged structure. Vegetation can be controlled by grazing, mowing, flame, the use of chemicals and by hand. Sand silt deposits will be removed with equipment or by hand. The amounts and types of damage to structures will determine the maintenance methods and materials needed.

26.

This statement of policy and principles may be amended from time to time, as may be deemed expedient, by a majority vote of the governing body of the Drainage District.

WITNESS OUR HANDS, in triplicate originals, this 13 day of June, 1950.

OF FORT BEND COUNTY, TEXAS.

Comes now the HOUSTON PIPE LINE COMPANY, a corporation organized and chartered under the Laws of Texas, with its principal office and domicile at Houston, Harris County, Texas, hereinafter called Company and respectfully shows to the Commissioners Court of Fort Bend County, Texas, as follows:

(1) That Company is engaged in the business of storing, transporting, buying and sell-

ing oil, gas, salt, brine and other mineral solutions and has all the rights and powers given under the Laws of Texas to such corporation, together with the right to lay down, construct, maintain and operate pipe lines, tubes, tanks, pump stations, connections, fixtures, etc., and also in connection therewith, telegraph and telephone lines and other facilities and appliances suitable for and needful in such storing, transporting, buying and selling of oil, gas, salt, brine and other mineral solutions.

Several of such lines have been for more than twenty (20) years constructed, maintained and operated in Fort Bend County, Texas. It will be necessary as the occasion arises from time to time in the future to lay, construct, maintain and operate other and additional such pipe lines in Fort Bend County, TExas.

(4) Company shows that on the 17th day of August, 1925, the Commissioners Court of Fort Bend County, Texas granted a franchise to Company, its successors and assigns, or either of them, to build, construct, maintain, use and operate such lines along and across, on, in and under any of the public roads and highways, and the streets and alleys of unincorporated cities and towns and other public grounds in Fort Bend County, Texas, with the right to repair, change, discontinue and remove the same, in whole or in part, at any time and with all suitable and necessary right of ingress and egress, which said franchise was granted for a period of twenty-five (25) years.

The parties hereto further agree to the following conditions:

1. The Architect's Services-- The Architect's professional services consist of the necessary conferences, the preparation of preliminary studies, working drawings, specifications, large scale and full size detail drawings, for architectural, structural, plumbing, heating, electrical, and other mechanical work; assistance in the drafting of forms of proposals and contracts; the issuance of certificates of payment; the keeping of accounts, the general administration of the business and supervision of the work.

2. Reimbursements.--

3. Separate Contracts.--The basic rate applies to work let under a single contract. For any portions of the work let under separate contracts, on account of extra service thereby required, the rate shall be four per cent greater, and if substantially all the work is so let the higher rate shall apply to the entire work; but there shall be no such increase on the plumbing, heating, electrical and other mechanical work or on any contracts in connection with which the Owner reimburses special consultants'fees to the Architect but purchased under his direction.

4. Extra Services and Special Cases.--If the Architect is caused extra drafting or other expense due to changes ordered by the Owner, or due to the delinquency or insolvency of the Owner or Contractor, or as a result of damage by fire, he shall be equitably paid for such extra expense and the service involved.

Work let on any cost-plus basis shall be the subject of a special charge in accord with the special service required.

If any work designed or specified by the Architect is abandoned or suspended, in whole or in part, the Architect is to be paid for the service rendered on account of it.

5. Payments.--Payments to the Architect on account of his fee shall be made as follows, subject to the provisions of Art. 4:

Upon completion of the preliminary studies, a sum equal to 25% of the basic rate computed upon a reasonable estimated cost.

During the period of preparation of specifications and general working drawings (exclusive of details) monthly payments aggregating at the completion thereof a sum sufficient to increase payments to 75% of the rate or rates of commission arising from this agreement, computed upon a reasonable cost estimated on such completed specifications and drawings, or if bids have been received,then computed upon the lowest bona fide bid or bids.

From time to time during the execution of work and in proportion to the amount of service rendered by the Architect, payments shall be made until the aggregate of all payments made on account of the fee under this Article, but not including any covered by the provisions of Article 4, shall be a sum equal to the rate or rates of commission arising from this agreement, computed upon the final cost of the work.

Payments to the Architect, other than those on his fee, fall due from time to time as his work is done or as costs are incurred.

No deductions shall be made from the Architect's fee on account of penalty,liquidated damages, or other sums withheld from payments to contractors.

6. Survey, Borings and Tests.--The Owner shall, so far as the work under this agreement may require, furnish the Architect with the following information: A complete and accurate survey of the building site, giving the grades and lines of streets, pavements, adjoining properties; the rights, restrictions, easements, boundaries, and contours of the building site, and full information as to sewer, water, gas and electrical service. The Owner is to pay for borings or test pits and for chemical, mechanical, or other tests when required.

7. Supervision of the Work.--The Architect will endeavor to guard the Owner against defects and deficiencies in the work of contractors, but he does not guarantee the performance of their contracts. The supervision of an Architect is to be distinguished from the continuous personal superintendence to be obtained by the employment of a clerk-of-the-works.

When authorized by the Owner, a clerk-of-the-works acceptable to both Owner and Architect shall be engaged by the Architect at a salary satisfactory to the Owner and paid by the Owner, upon presentation of the Architect's monthly statements.

8. Preliminary Estimates.-- When requested to do so the Architect will furnish preliminary estimates on the cost of the work, but he does not guarantee the accuracy of such estimates.

9. Definition of the Cost of the Work.--The cost of the work, as herein referred to, means the cost to the Owner, but such cost shall not include any Architect's or Special Consultant's fees or reimbursements or the cost of a clerk-of-the-works.

When labor or material is furnished by the Owner below its market cost the cost of the work shall be computed upon such market cost.

10. Ownership of Documents.--Drawings and specifications as instruments of service are the property of the Architect whether the work for which they are made be executed or not, and are not to be used on other work except by agreement with the Architect.

11. Successors and Assignments.--The Owner and the Architect, each binds himself, his partners, successors, executors, administrators, and assigns to the other party to this agreement, and to the partners, successors, executors, administrators and assigns of such other party in respect of all covenants of this agreement.

Except as above, neither the Owner nor the Architect shall assign, sublet or transfer his interest in this agreement without the written consent of the other.

12. Arbitration.--All questions in dispute under this agreement shall be submitted to arbitration at the choice of either party.

It is understood between both parties that the $750.00 fee for making the survey is included in the fees recited for the new work or the remodeling in the event one or both of them are accepted by the Court. It is therefore agreed that the $750.00 fee will constitute the only obligation to the Architect by the Court in case the Court decided not to go ahead with the project at the end of the survey.

The Owner and the Architect hereby agree to the full performance of the covenants contained herein.

IN WITNESS WHEREOF they have executed this agreement, the day and year first above written.

The following resolution was introduced by Commissioner Teykl, who moved its adoption; Commissioner Wirtz seconded the motion and the following resolution was unanimously adopted:

IN RE C. H. STANCLIFF DELINQUENT DRAINAGE TAX
FOR YEAR 1925 on 358.50 ACRES OF LAND IN ABST.
1, E. ALLCORN SURVEY IN FORT BEND COUNTY, TEXAS

WHEREAS, it appears from the tax rolls of Fort Bend County, Texas, that in the year 1925 the drainage taxes for Drainage District No. 3, were carried on a spearate roll from the other taxes due on property in that District, and there was assessed the sum of $71.60 against the land owned by C. H. Stancliff, consisting of 358.50 acres out of Abst. No. 1, E. Allcorn Survey, and it appears that the same is now delinquent for that year;

AND, it further appearing that all other taxes were paid against said tract of land by said owner, and that the then Tax Collector evidently overlooked checking the drainage district rolls, and inadvertently failed to collect the drainage tax for that year, and the same still appears on the delinquent tax rolls of this county, and the owners of said land are wanting to pay said delinquent item, but feel that they should not be forced to pay the penalty and interest now accumulated against said item by reason of the fact that it was an error of the Tax Collector, and through no fault of the owner, and the Commissioners Court being of the opinion that it would be an injustice to the said owner of said land to be forced to pay said penalty and interest on said taxes;

It Is Therefore, ordered by the Commissioners Court that the Tax Collector, W. B. Emerson, be and he is hereby ordered and authorized to remit said penalty and interest now accumulated against said tax item and is authorized to collect from the land owner the net amount of the original taxes, towit, $71.60 in full settlement of said delinquent tax item, and to issue to the said land owner his redemption receipt therefor upon the payment of said amount.

III.

The applicant further agrees, in connection herewith, to save and hold harmless the said County against any and all liability that it may have, or appear to have, to any person whomsoever by reason of any act or thing that applicant, its agents, servants, employees and contractors may do or cause to be done in the premises.

V.

This applicant agrees that the rights hereby conferred shall be enjoyed only at the sufferance of the Commissioners' Court of Fort Bend County, and that said court may at any time terminate the right of applicant to use the property hereby affected, and that in the event of such termination applicant will promptly remove from the County's property affected hereby all property heretofore or hereafter placed thereon by it, and that applicant will restore the County's property hereby affected to the same condition that the same was in before such removal.

provided that if there shall be any conflict between the terms and conditions of this Application and any former applications, franchise or instrument of a similar nature granted by the Commissioners' Court of Fort Bend County, this application and its terms and conditions shall supersede and stand in lieu of that part of such former application, franchise or similar instrument which may be in conflict with the terms hereof.

RE: NOTICE OF REALLOCATION ELECTION

NOTICE OF ELECTION FOR THE REALLOCATION OF COUNTY TAXES

THE STATE OF TEXAS

COUNTY OF FORT BEND

On this, the 11th day of February, 1952, the Commissioners' Court of Fort Bend County, Texas, convened in Regular Session, at the regular meeting place thereof at Richmond, Texas, the following members of the court, to-wit:

H. Cecil Baker, County Judge, presiding; and

J. M. Kovar	Commissioner, Precinct No. 1
Louis Teykl	Commissioner, Precinct No. 2
Mrs. I. G. Wirtz, Jr.	Commissioner, Precinct No. 3
Ed H. Helwig	Commissioner, Precinct No. 4

being present, and among other proceedings had by the Court were the following:

Commissioner Kovar introduced the following order and moved its adoption by the Court:

Whereas, at the general election held throughout the State of Texas on the 7th day of November, 1944, the qualified electors of the State, voting on the proposition, approved the amendment to Section 9 of Article 8 of the Constituion of Texas by changing said Section 9 so as to provide that the Commissioners' Court in any county may re-allocate the county tax levies authorized in said Section by changing the rates provided for any of the purposes authorized in said Section by either increasing or decreasing the same, but in no event shall the total of such taxes exceed Eighty Cents (80¢) on the One Hundred Dollars' valution for any one year, but that before such Commissioners' Court may make such re-allocations and changes in such levies that the same shall be submitted to the qualified property taxpaying voters of such county at a general or special election and shall be approved by a majority of the qualified property taxpaying voters, voting at such election, and in event such re-allocations and changes in such county tax levies are approved by the qualified property taxpaying voters of any such county, such re-allocations and changes shall remain in force and effect for a period of six (6) years from the date of the election, at which same shall have been approved, unless the same again shall have been changed by a majority of the qualified property taxpaying voters of such county, voting on the proposition, after submission by the Commissioners' Court at a general or special election for that purpose; and,

WHEREAS, it is the judgment of the Commissioners' Court of Fort Bend County, Texas, that it will be to the best interests and general welfare of the County to re-allocate the County taxes authorized to be levied annually by Section 9, Article 8 of the Constitution, by changing the rates in respect of certain county taxes as herein provided; and

WHEREAS, it now being impracticable and impossible to submit the proposed re-allocations and changes in such County taxes to the qualified property taxpaying voters of said County at a general election, it is accordingly the judgment of the Court that the proposition be submitted to the qualified property taxpaying voters of said County at a special election; therefore

BE IT ORDERED BY THE COMMISSIONERS' COURT OF FORT BEND COUNTY, TEXAS:

That a special election be held in said County on the 7th day of March, 1952, which is not less than twenty (20) days from the date of the adoption of this order, at which election the following proposition shall be submitted to the qualified property taxpaying voters who own taxable property in said County and who have duly rendered the same for taxation, for their action thereupon:

"SHALL the Commissioners' Court of the County of Fort Bend, Texas, be authorized to levy and collect in and for each of the year 1952 to 1957, both inclusive, the following County taxes, to-wit:

All voters desiring to support the proposition shall have written or printed upon their ballots:

RE: FINANCIAL STATEMENT OF FORT BEND COUNTY DRAINAGE DISTRICT

FORT BEND COUNTY DRAINAGE DISTRICT
FINANCIAL STATEMENT
(as printed in County Newspapers)

The Commissioners' Court of Fort Bend County wishes to take this means of calling to the attention of the Taxpayers of Fort Bend County, that elsewhere in this issue of (your County newspaper) is a complete report on the operations of the Fort Bend County Drainage District from the date of its origination to January 1, 1952, printed in full. This report includes financial statement, inventory of property on hand and summary of work done by the

district up to January 1, of this year.

The report was considered and approved in a joint conference by the Commissioners' Court who are by statute named directors of the District and the Supervisors of the Soil Conservation District.

Your attention is called particularly to the following items appearing in said report:

(1). The Drainage District has purchased $2,000,000. worth of short term U. S. Government Treasury Notes bearing interest at the rate of 1¼% per annum. Similar securities were purchased shortly after the sale of the Drainage District Bonds and have been reinvested as the securities mature. From this investment, the Drainage District has collected the sum of $67,870.88.. In addition to that a certain amount of interest had accrued but had not been paid as of January 1, 1952. It is expected that approximately $25,000.00 in interest will be collected in 1952.

(2). Independent of the $2,000,000.00 worth of Government Securities, the estimated total moneys available for expenditure in 1952 is $223,952.25.

(3) The Drainage District has purchased and has on hand as of January 1, 1952, field equipment having a value of $161,370.28; office equipment in the amount of $2,351.17 and material in stock in the amount of $3,800.00.

(4). As of January 1, the Drainage District had excavated 288,000 yds. of dirt over a distance of 15.3 miles, cleared 29.1 miles, spread 255,000 yds. of dirt and cleared 440 acres of land in nine different water sheds within the district, all at a cost particularly itemized as to each separate project in the report.

(5). The original bond issue was $2,170,000.00 payable in more or less even maturities over a fifteen year period; that is to say, we are paying the bonds off at the rate of $145,000.00 per year. As of the first of the year we had paid 290 - $1,000.00 bonds or $290,000.00 on the principal. Another 145 - $1,000.00 bonds will be paid off shortly. The cash balance in the Sinking Fund for this purpose on January 1 was $205,228.86. The total amount of moneys on hand and collected including the $2,000,000.00 in Treasury Notes and exclusive of interest accrued but unpaid, the Fort Bend County Drainage District, as of January 1, 1952, had on hand the sum of $2,379,587.59.

(6). The work to date that has been done and the bonds that have been paid off has been done with money raised from a 43¢ tax to retire the bonds and a 22¢ maintenance tax. Approximately 78% of our district values and therefore 78% of our total taxes are collected from taxes on oil, gas, sulphur, pipe lines, railroads and other public utilities. 22% is collected from taxes on city property, farms, and ranches and other types and kinds of property within the County which means in effect, that for every $100.00 ditch we dig, local property pays $22.00 for the ditch.

(7). The $2,170,000.00 worth of bonds were sold so that they could be paid off and retired while the county has a favorable tax structure as between local property -- and oil, gas, sulphur, pipe lines and other utilities. Someday our oil, gas and minerals will be depleted.

The Drainage District has been, up to the present time, limited and handicapped in their operations because of the delay by the Corps. of Engineers in completing their reports on the major drainageways in Fort Bend County which they propose to open at their expense. The Korean War has delayed the progress of the Corps. of Engineers.

The operations of the Drainage District have been necessarily confined to areas that had adequate ultimate outlets for the water. For example, the Drainage District cannot open up tributaries to Big Creek until the main channel of Big Creek has been opened. The main

channel is a part of the work that the Corp. of Engineers proposes to do.

The Drainage District has been further delayed for the reason thatthe district wants to know positively that the Corp. of Engineers will do what they propose to do and that Congress has authorized the project and made an appropriation of the money before the Drainage District goes into full scale operations; because if the Corps. of Engineers does not, in fact, do what they propose to do, then the Drainage District must revise their plans so as to insure equal treatment in all parts of the county. If the Corps. of Engineers fall down on their part of the work, then it is obvious that the Drainage standards set up for the county will have to be reduced in order to cover the whole county. For this reason, the Drainage District has had to more or less mark time waiting to see exactly what the Corps. of Engineers are going to do.

The supervisors of the Soil Conservation District agreed with the Directors of the Drainage District that under the circumstances the Drainage District had no other alternative other than to wait for a definite determination as to what the Corps. of Engineers was going to do and that limited operations where adequate outlets could be found, should be continued as in the past, and that pending definite information as to exactly what the Corps. of Engineers was going to do that the $2,000,000.00 in Government Treasury Notes should be kept intact and reinvested as occasion required, in Short Term Government Notes or Bonds that could be liquidated on short notice. The average interest rate on the Drainage District Bonds is 2.14% less a rate of 1¼% interest on the Treasury Notes, leaving a net interest rate of 89% or less than 1% to be paid by the taxpayers on this money.

RE: ORDER ON SCANLAN ESTATE DELINQUENT TAXES - 1941 THROUGH 1946 INCLUSIVE

Be it remembered that on this the 16th day of June, A.D. 1952, the Commissioners' Court of Fort Bend County, being convened in special meeting, called up for consideration the matter of Scanlan Estate Delinquent Taxes for the years 1941 through 1946, inclusive, upon certain oryalty interest, the following order was, upon motion of Commissioner Kovar, seconded by Commissioner Helwig and regularly passed by unanimous vote of the members of said Commissioners' Court, to-wit:

The Court having heard the evidence with regard to all phases of State and County Ad Valorem Taxes for the years 1941 through 1946, inclusive, upon the royalty interest in the respective acreage situated in Thomas Barnett, D. Fitzgerald and Wm. Hall Surveys, Fort Bend County, Texas, assessed against the T. H. Scanlan Estate and its successors as shown on the tax assessment and rolls of Fort Bend County for each and all of said years, finds and determines that said royalty interests were attempted to be assessed by the Tax Assessor separate and apart from the property as rendered by the owner who had no notice that said royalty interests were not included in the renditions as made by him on his sworn tax inventory presented to him by the Tax Assessor; that all ad valorem taxes with which any of said lands and property might be chargeable in any manner had been paid in full by the owner thereof promptly when due for each and every year from 1941 through 1946, inclusive;

that said royalty interests were placed on the unrendered personal property rolls by the Tax Assessor without notice to the owner; that said manner and method of assessing said property was fundamentally wrong and invalid; and that the purported levy and assessments of the royalty interests on said lands for the years 1941 through 1946, included taxes which had already been paid and said assessments were unauthorized by law and constituted a double assessment and were therefore invalid and void. It is therefore, ORDERED, ADJUDGED AND DECREED by the Commissioners' Court of Fort Bend County, Texas, that the Assessor and Collector of Taxes of said County is hereby authorized, directed and ordered to cancel and eliminate from the tax rolls of said county, each and all of said assessments of royalty interests in and under said lands for the years 1941 through 1946, inclusive, as having been previously paid in full on owner's voluntary renditions.

RE: RESOLUTION RE BERNARD RIVER

The following resolution was introduced by Commissioner Louis Teykl, Precinct No. 2, Fort Bend County, who made a motion that it be adopted. The motion was seconded by Commissioner J. M. Kovar, Precinct No. 1, Fort Bend County, Texas, and unanimously adopted:

WHEREAS, the normal flow of flood waters in the Bernard River is seriously impeded by fallen trees, drift wood and other debris; and

WHEREAS, the channel of the Bernard River is, in some instances, inadequate and in need of rectification; and

WHEREAS, the clearing, dredging and rectification of the Bernard River would be a great direct and material advantage to the lands in Fort Bend County whose agricultural drainage is now inadequate; and

WHEREAS, the deficiencies aforesaid in the Bernard River result in periodic

disasterous flooding of lands lying within Fort Bend County; and

WHEREAS, the U. S. Corps. of Engineers, Department of the Army, has heretofore cleared and dredged a certain portion of the San Bernard River beginning at it s mouth and making this portion of said river navigable; and

WHEREAS, The Commissioners' Court of Fort Bend County believes and have reason to believe that an extension of this project by further widening and dredging the Bernard River, upstream so as to be suitable for navigation, is, and would be a feasible project from an economic standpoint, having consideration to the cost on the one hand and the benefits on the other.

NOW, THEREFORE, BE IT RESOLVED, that the Commissioners' Court of Fort Bend County do hereby request and petition the U. S. Corps of Engineers, Department of the Army to conduct a survey of the Bernard River to determine the feasibility of extending the navigable channel upstream to and including a portion of said river, bounding Fort Bend County on the west; and

BE IT FURTHER RESOLVED, that the U. S. Corps. of Engineers, Dept. of the Army, be requested to take into particular account the vast agricultural benefits that would be derived from such a project; and

BE IT FURTHER RESOLVED, that if and when such survey is made by the Corps. of Engineers, that the findings thereof be submitted to and discussed with Fort Bend County by the U. S. Corps. of Engineers, Department of the Army; and that the Corps. of Engineers suggest at that time what might be deemed a fair cash contribution on the part of Fort Bend County or the Fort Bend County Drainage District, to compensate on a fair basis for the benefits that would be expected to flow to the property owners of Fort Bend County from such a project, if completed.

BE IT FURTHER RESOLVED, that a copy of this resolution be sent to the Galveston Office of the Corps. of Engineers, the Division Engineers of the Corps. of Engineers, Dallas, Texas, and to the Chief Engineer of the Corps. of Engineers, Washington, D.C., and to the Board of Review, Committee on Rivers and Harbors, U. S. Congress, Washington, D.C., ;and

BE IT FURTHER RESOLVED that the offices and agencies so addressed, be requested to communicate with the Commissioners' Court of Fort Bend County, their reaction to the subject matter of this resolution.
